INDUSTRIES: Real Estate, Healthcare

TECHNICAL SKILLS

• Machine Learning	5 years
• Data Science	5 years & 2 months
• React	5 years & 1 months
• PHP	5 years
• Laravel	5 years

PROJECT DETAILS

• Enterprise Resource Planning

Project Description: Bakeri Group is one of the oldest and trusted real estate developers in India. Ever since its genesis in 1959, Bakeri Group has been a synonym of trust, transparency, and ethical practices. Building a wide range of residential, commercial, and plotted development projects, Bakeri Group has developed millions of sq. ft. of property and has reached over 1.25 lakh people in Ahmedabad.
Responsibilities: This Project has mainly three main sections: Purchase, Sales & Account Departments. The user of each department can enter the data into their assigned doctype/Form from the dashboard into the system. There is an approval cycle in the system, which helps the high authority to approve/reject the document. Once the entry has been done then the user can filter the report as per his/their requirement or he/she can email the payment receipt to the supplier/customer. The administrator can assign the user a specific role so that they can perform that specific task and it can be controlled via role & permission access.
Technologies: Python 2.7x, Frappe Framework, Nodejs, MariaDB
Industry: Real Estate

• Data Pipeline Creation

Project Description: Johnson and Johnson is a medical device company. It is an American multinational corporation founded in 1886 that develops medical devices, pharmaceuticals, and consumer packaged goods. It is one of the world's most valuable companies. It is the company that falls under the list of fortune 500 largest companies. Johnson & Johnson researches and develops various products while selling them in the field of healthcare worldwide.
Responsibilities: Led and created data pipelines, which used millions of data points, for the identification of the best strategies to increase the effectiveness of professional educational events (specifically those events for medical device training all across the USA and elsewhere).
Technologies: Python, Tensorflow, Numpy, Pandas
Industry: Healthcare
