As a recent graduate in Computer Science, I am eager to apply my skills and knowledge to make a meaningful impact in the world of technology. With a strong foundation in Android App Development, Cloud Computing, and Testing, I am committed to continuous learning and staying up-to-date with the latest industry trends. During my academic journey, I have had the opportunity to work on multiple projects that have helped me hone my problem-solving abilities, teamwork, and communication skills. Some highlights include: Designing and developing an Android application for a local business, resulting in a 30% increase in customer engagement. Collaborating with a team to implement a cloud-based storage solution for a university project, improving data accessibility and security. Conducting thorough testing and debugging to ensure the quality and reliability of software applications. As I embark on my professional journey, I am excited to contribute my expertise and grow as a software engineer. I am confident in my ability to adapt and excel in diverse work environments, and I am eager to connect with like-minded professionals who share my passion for innovation and excellence. Please feel free to reach out for networking opportunities, collaboration, or just to say hello!

**INDUSTRIES:** Information Technology, Automation

## SOFT SKILLS

Leadership, Teamwork, Time management, Presentation

## PROJECT DETAILS

• Content Streaming Platform — April-2021 - July-2023

Project Description: Designed a platform using for recommending and streaming content on the fly using Android Studio, Java, Kotlin, XML & Firebase. The main objective was to provide a platform for new & young content producers to showcase their work to a wide audience.
Responsibilities: This was a solo college project. My responsibilities included designing the app, searching for APIs providing information on movies, TV shows etc, and creating a cloud database.
Technologies: Java, XML, Firebase, Android Studio, MovieDatabase API
Industry: Information Technology

• Resume Screening Bot September-2021 - December-2023

Project Description: Worked on a project that involved development of a bot assistant created using UiPath for screening resumes using UiPath. The bot is capable of downloading multiple resumes at once from emails. The key objective is to filter resumes based on certain skills and can highlight potential candidates within a few minutes. Collaborated in a team of 3, & delegated tasks to each by understanding their strengths and weaknesses. Also provided guidance, towards understanding the entire scope of the project.
Responsibilities: Choosing the right technology and approach of designing the bot.
Technologies: UiPath
Industry: Automation

## EMPLOYMENT HISTORY

• Freelancer - Subject Matter Expert (Computer Science) August-2020 - April-2023
