A Discord bot developer with Chabot projects development experience. Have developed Modmail service and Welcomer bot. Have been actively developing AUIBot project since 2019 till date. Would like to work on challenging discord/telegram projects.

INDUSTRIES: Utilities, Entertainment, Construction

TECHNICAL SKILLS

• Discord	4 years
• Python	3 years
• Scrapy	2 years
• AWS	2 years
• SQL	1 years

PROJECT DETAILS

• Welcomer Bot — October-2023 - November-2023

Project Description: To develop a Discord Welcomer bot that enhances the onboarding experience for server members by sending customizable welcome messages upon joining and leaving. The Welcomer Discord bot should be a robust and customizable solution aimed at enhancing the user onboarding experience for Discord servers.

Responsibilities: Built a bot that actively listens for guild joins and leaves. Administrators can set specific channels for welcome and leave messages. Customizable embeds for welcome and leave messages.Variable formatting in description message. Utilizes the PIL library for image editing for welcome images. Stores per-server information, ensuring a personalized experience for each server. By leveraging event listeners, customizable channels, and dynamic embeds, the bot ensured that server administrators have the tools needed to create a welcoming atmosphere for new members. Implemented: 1. Channel Configuration -- Admins can set specific channels for welcome and leave messages. 2. Embed Customization -- Fully customizable embeds for welcome and leave messages. Support for variables in descriptions, allowing dynamic content. 3. dedicated Database -- The bot can automatically store new servers in the database upon joining a new guild

Technologies: Language: Python Framework: Discord.py Database: SQLite Image Editing: PIL (Pillow) Library

Industry: Utilities

• AUIBot May-2019 - January-2024

Project Description: To develop a feature-rich Discord bot designed to bring a virtual world to your server. Explore over 100 commands, including virtual economy, AI interactions, multiplayer games, and more. GOALS 1. Encourage users to join a community hub for discussions, updates, and a sense of belonging, establishing a community around AUIBot. 2. Incorporate AI features such as GPT-3.5 interactions, text-to-image conversion, text-to-speech, text-to-music, and image upscaling to showcase the power of AI within Discord. 3. Provide entertaining multiplayer games like Poker, Snakes & Ladders, and Tic Tac Toe to foster community interaction and gaming experiences.

Responsibilities: AUIBot is a feature-packed Discord bot is developed offering a virtual experience. Users can enjoy virtual economy, AI interactions, multiplayer games, and music. The bot introduces virtual pets, character creation, and virtual devices. Advanced AI functionalities include GPT-3.5, text-to-image, text-to-speech, and more. AUIBot hosts poker, Snakes & Ladders, Tic Tac Toe, and music options. Community engagement is encouraged through a hub for discussions. Continuous development ensures future enhancements.

Technologies: Python, Discord

Industry: Entertainment

• WebBot – Scraping April-2022 - January-2024

Project Description: To develop web bots for an aggregator that streamlines construction submittals Language: Python Framework: Scrapy Output: JSON

Responsibilities: Designed core modules for data collection from websites using Python - Scrapy. Development and maintenance of crawlers that extracts data from multiple websites, including electrical and lighting. Cracked solutions for challenging sites that uses heavy Javascript or complex POST request. Analyzed and parsed HTML, CSS, data to extract relevant information, such as product title, PDFs, description, mounting type, environment, dimming protocol, category name, etc. Used JIRA APIs for reporting and bug tracking Provide technical support to fellow engineers to solve their crawling challenges.

Technologies: Python, scrapy

Industry: Construction

• ModMail Service November-2022 - December-2022

Project Description: A Discord bot was developed that was equipped with advanced features to streamline communication between users and moderators, ensuring efficient thread management and user privacy. Feature list included Thread Management, in-built profanity filter, privacy safeguards, fully customizable embeds, action buttons for admins, logging for threads, attachment handling. Requirement 1: Customization ModMail should allow administrators to customize welcoming/closing messages, embeds, descriptions, titles, and footers. Requirement 2: Flexibility in Configuration Administrators should be able to set channel and category IDs according to their convenience, ensuring seamless integration with existing Discord server structures. Requirement 3: Privacy & Security The bot should ensure user privacy by concealing admin and moderator identities from end-users while providing admins with user information. Additionally, the bot should have an inbuilt profanity filter to avoid unnecessary spam.

Responsibilities: A robust Discord bot was developed for seamless data management. Designed with administrators and moderators in mind. It streamlined communication, ensuring a secure and efficient channel for user interactions while maintaining user privacy.

Technologies: Discord

Industry: Utilities

EMPLOYMENT HISTORY

• Software Developer April-2022 - January-2024

Description: As a software developer, full-time permanent role, the responsibilities are to (1) to develop discord bots (2) ensure an uninterrupted flow of data from the various sources by crawling the web Extracting & managing large volumes of structured and unstructured data, with the ability to parse data into standardized format for ingestion into data sources Actively participate in troubleshooting, debugging & maintaining the broken crawlers Scraping difficult websites by deploying anti-blocking and anti-captcha tools Strong data analysis skills working with data quality, data consolidation and data wrangling Solid understanding of Data structures and Algorithms Comply with coding standards and technical design

EDUCATION

• Bachelors degree in Computer from Pune 2019 - 2022

LANGUAGES

• English - advanced
