I'm a seasoned Full Stack Developer specializing in frontend and backend technologies. With a strong track record in architecting solutions for payment exchanges, fast transactions, and rewards programs, I've also played a crucial role in developing a payout product from scratch. Proficient in React.js, Vue.js, and Node.js (Hapi framework), I excel in task ownership, ensuring timely feature delivery. My passion for technology and collaborative nature drive success in every project I undertake.

INDUSTRIES: Education, Web3, Marketplace

TECHNICAL SKILLS

• Node.js	4 years & 2 months
• React Redux	3 years & 2 months
• Vue.js	3 years & 2 months
• React Native	2 years
• PostgreSQL	2 years

PROJECT DETAILS

• STAR TUTOR January-2021 - July-2021

Project Description: A platform to manage every social event and create new social events. The platform facilitates the selling, purchase, and promotion of events around the globe. The location feature helps users to fnd the event ongoing near them

Responsibilities: Frontend (React native) - Design and implement the user interface for the mobile application using React Native. Create a seamless and intuitive experience for students and parents to register, choose subjects, and access scheduled classes. Utilize React Native Web to compile the mobile application for web accessibility, ensuring a responsive design for both mobile and web platforms. Implement secure user authentication for students and parents, enabling them to access personalized content and features. Develop features for class schedule management, allowing users to view, enroll, and receive notifications for scheduled classes.

Technologies: React Native

Industry: Education

• Rocketfuelblockchain July-2021 - January-2024

Project Description: A next-generation one-click payment gateway for cryptocurrencies . The product can be integrated into the merchant systems using the various SDK available. The product helps the merchant to accept payments in form of cryptocurrencies and other fat options from online shoppers. The shoppers can pay using their crypto wallet, exchanges like Binance US, Binance, Okcoin, etc, and Bank transfers. other products of rocketfuelblockchain are payouts, rewards programs, and B2B transfers.
Responsibilities: Architected comprehensive solution designs for exchange payments, ensuring efficiency and security in financial transactions. Developed and implemented designs for fast confirmation payments to enhance transaction speed and user experience. Designed and implemented a robust rewards program to incentivize user engagement and loyalty. Full Stack Development: Worked extensively on both the frontend and backend components of various projects. Utilized React.js and Vue.js for frontend development, creating intuitive user interfaces and seamless experiences for end-users. Implemented backend functionalities using Node.js within the Hapi framework, ensuring a scalable and efficient server-side architecture. Payout Product Development: Played a pivotal role in conceptualizing and building a payout product from the ground up. Developed backend logic for processing payout transactions, incorporating security measures to safeguard sensitive financial data. Implemented frontend components using React.js to facilitate a user-friendly interface for merchants managing payout transactions. Task Ownership and Sprint Management: Took ownership of tasks within the development team, demonstrating leadership and accountability. Managed features throughout the development lifecycle, ensuring timely delivery within sprint cycles. Collaborated with team members to streamline task execution, maintain project timelines, and achieve sprint goals. Technology Stack: Applied expertise in React.js and Vue.js for frontend development, creating dynamic and responsive user interfaces. Leveraged Node.js within the Hapi framework for backend development, ensuring the scalability and efficiency of server-side processes.
Technologies: Node js, react js, vue js
Industry: Web3

• INVOCK July-2020 - December-2020

Project Description: A digital shop for ofine shop owners. The owners can easily Register their shop to the portal and open their own digital IShop through an App and they get their own shop URL that can be easily shared over various social media platforms. The app provides services such as inventory management including ordering new products through the retailers, and managing the stocks and sales.
Responsibilities: Design and implement the server-side architecture using NodeJS with Express. Develop APIs to handle user registration, shop creation, and management functionalities. Integrate a robust database system, such as Postgres, for efficient data storage and retrieval. Frontend Development (React Native): Create a user-friendly mobile application for both Android and iOS platforms. Design and implement the user interface, focusing on an intuitive and seamless experience for shop owners. Develop features for shop registration, allowing owners to easily set up their digital iShop through the app.
Technologies: React Native, Node JS
Industry: Marketplace

EMPLOYMENT HISTORY

• Full Stack Developer March-2023 - January-2024

Description: Collaborated within a Scrum team to deliver a product. Managed projects at the development level, ensuring smooth execution.

• Full Stack Developer January-2021 - January-2023

Acquaintsoft Tech Pvt ltd, Ahmedabad
Description: Conducted code unit testing and handled deployments. Designed backend architecture and developed wireframes for the frontend. Developed applications with a focus on clean UX/UI and a streamlined, independent code structure.

• Full Stack Developer April-2020 - December-2020

Hashbinary, Mumbai

Description: Cooperated with designers to create clean interfaces and simple, intuitive interactions and experiences. Worked with the senior developer to manage large, complex design projects. Completed detailed programming and development tasks for front-end public and internal websites, as well as challenging back-end server code. Emphasized Agile development principles to enhance project efficiency.

CERTIFICATION

• ADVANCE JAVA by DURGASOFT 2019

EDUCATION

• School degree in COMPUTER SCIENCE from Dhaneswar Rath Institute of Engineering and Management Studies, Cuttack 2017 - 2021

• School degree in INTERMEDIATE from Kerala Public School, Kadma 2016 - 2017

• Bachelors degree in MATRIC from Kerala Public School, Kadma 2013 - 2014

LANGUAGES

• English - advanced
