Channeling my passion into the world of software development. C# is my favorite language, and I thrive on embracing new challenges in this dynamic field. Capable and highly motivated to perform at the highest level.

INDUSTRIES: Marketplace, Government

TECHNICAL SKILLS

• C#	8 years
• SQL Server	6 years
• Vue.js	2 years & 4 months
• React Native	2 years & 8 months
• DevOps	6 months

PROJECT DETAILS

• SmileMates — April-2023 - October-2023

Project Description: "smileMates" is a loyalty system designed to reward customers for their patronage. Every service purchase earns points, and special offers accompany server purchases, enhancing the accumulation of points. Customers can redeem these points for discounts, creating an engaging and incentivizing experience that fosters loyalty and satisfaction within the "smileMates" community.
Responsibilities: In my role encompassing planning, project management, and development, I orchestrate strategic plans, manage project timelines, allocate resources, and contribute hands-on to the development of projects. This multifaceted position involves overseeing the entire project lifecycle to ensure efficient execution, timely delivery, and successful implementation of initiatives.
Technologies: Vuejs3, ASP.Net core api, SQL Server, SAP and redis
Industry: Marketplace

• Noragrtn.com — November-2023 - January-2024

Project Description: The "noragrtn" system is a government appointment platform enabling citizens to schedule appointments for various government services. This user-friendly system streamlines the appointment process, providing an efficient way for people to access and engage with government services without the hassle of long queues or wait times.
Responsibilities: In "noragrtn," I develop and plan, ensuring a smooth, efficient government appointment system.
Technologies: .net Core APi, MS Sql Server, VueJs3
Industry: Government
