I have been working in the Web3 space. I have been designing and developing NFTs I can design and create 10,000 NFTs in a short amount if time I've had a few years of experience as a freelance artist and am now all-in in the web3 world. I absolutely love the NFT community and enjoy bringing quick and cost-efficient artistry services to my clients. So if you're ready to explore the revolutionary world of NFTs, I'm here at your service! Do you want to launch an NFT art project to sell and make money on OpenSea or any other platform? The NFT market is developing very fast, now and there are tones of new arts created every day. To get noticed and earn on NFT you have to have a unique and custom art done by a professional. I also have some experience in Blockchain Development, Smart Contracts, NFT Marketplaces, Pancake swap, ERC20 Tokens. I am a Blockchain developer with over 5+ years of work experience in the Crypto and Blockchain Industry. I love participating in creating amazing startups using agile methodologies and cutting-edge technologies, such as Blockchain + Smart Contracts, Cryptocurrencies & FinTech, ICO/ITO, Cloud and Server less computing, AI, Image and Voice Recognition, Machine Learning, Big Data, Infrastructure as Code, web and mobile tech and so on. I have high skills in different technologies, I am a quick learner, logical & hard worker. Creativity, Top quality, Delivery on time, communication skills, never give up attitude and long-lasting relationships are guaranteed. In the end, you're not just getting an efficient developer, but also someone that will help you with the project in general (excluding graphic design; I just know I'm not good in that area).

INDUSTRIES: Marketplace, Ecommerce

TECHNICAL SKILLS

• Java	8 years & 5 months
• Web3 Js	4 years & 5 months
• Solidity	3 years & 7 months
• Ethereum	3 years & 5 months
• Polygon	3 years & 9 months

SOFT SKILLS

Communication, full stack developer

PROJECT DETAILS

• ROVI M91 - Crypto Super App February-2020 - February-2024

Project Description: Chat with Friends & Earn - Centralized crypto Exchange, Blockchain Based secured messaging.

Responsibilities: In this project I worked as a lead architect and have dedicated the past 2 years to crafting a remarkably user-friendly centralized trading app interface. Our objective was to create a seamless experience where users can effortlessly buy and sell crypto coins/tokens with just two clicks Integrated a blockchain-based secure messaging module, seamlessly incorporates a wide range of cryptocurrencies, and effectively managed cryptocurrency wallets, transactions, and key management systems Created robust APIs and protocols that enable secure and efficient communication with blockchain networks Enhanced app compatibility and smooth interaction across multiple blockchain platforms while prioritizing user data, transaction, and private key protection through stringent security measures. Maintained vigilant monitoring and swift response to security incidents, such as intrusion attempts and data breaches Incorporate consensus algorithms, tokenomics, and other essential blockchain-specific functionalities Conducted comprehensive testing and meticulous auditing of smart contracts to detect and address vulnerabilities effectively

Technologies: Web3.js Node Python

Industry: Marketplace

• ROVI December-2020 - February-2024

Project Description: ROVI is building a decentralized commerce protocol to create and share immense economic value among billions of users, millions of SMBs, and developers while democratizing Crypto usage among masses. Some of the key features / complexities associated with this project includes - Smart contract development, multiple chain token management (Ethereum and polygon), Token vesting schedule for investors and team members, Staking functionality.

Responsibilities: I had the privilege of serving as the lead developer, dedicating the past 9 months to collaborating with a team in the creation of numerous contracts for various functionalities on the Ethereum chain Designing, coding, and testing secure smart contracts using Solidity or other blockchain programming languages to enable commerce functionalities like payment processing, escrow services, and dispute resolution Integrated, managed, and enabled seamless token transfers across Ethereum and Polygon networks through token bridges and implementing comprehensive token management features across multiple chains Designed and developed custom tokens or cryptocurrencies based on blockchain standards like ERC-20 or ERC-721, tailored to meet the specific requirements of the ROVI ecosystem

Technologies: Hardhat Truffle Remix Solidity Visual Studio Code

Industry: Ecommerce

EMPLOYMENT HISTORY

• Blockchain Developer January-2010 - February-2024

Description: Responsible for building all kind of blockchain and smart contract projects.

EDUCATION

• Masters degree in Masters of Technology from Rajasthan University 2007 - 2009

LANGUAGES

• English - advanced
