• Java	2 years & 5 months
• MySQL	2 years & 5 months
• Linux	2 years & 5 months
• Node.js	1 years & 3 months

SOFT SKILLS

Leadership, Teamwork, Communication, Adaptability

PROJECT DETAILS

• Aadhar Verification System — November-2023 - November-2023

Project Description: I developed a project where the user can enter the Aadhar number and it will return whether the entered number is valid or not.
Responsibilities: I developed the whole project using Python where I studied the behavior pattern of Aadhar number verification and used the same logic in my code
Technologies: Python
Industry: Identify Verification

• P2P Wallet system — December-2023 - January-2024

Project Description: Developed a P2P wallet banking system where the user can send money from one account to another and also the user can request money from other user
Responsibilities: I developed the whole full stack project from the beginning using the mern stack and html, CSS, javascript for frontend.
Technologies: MERN
Industry: FinTech

EMPLOYMENT HISTORY

• Backend Developer

Description: Collaborated with frontend developers to implement solutions that are aligned with and extend shared platforms and solutions. Provided technical expertise in areas of design, and implementation of backend APIs

• Data Analyst May-2022 - August-2022

Macro Mentors

Description: Assisted in performing Exploratory Data Analysis (EDA), Data Cleaning, Data processing, and Data manipulation task gaining hands-on experience in business analysis, data management and data sources

• Associate Technical Engineer July-2020 - August-2021

PowerSchool Pvt. Ltd.

Description: Boosted infrastructure availability from 73% to 95% and enhanced scalability by profiling APIs, tuning configurations, and automating remediation. Created seamless customer experience by categorizing 100+ requests in CRM, resolving 80% of issues remotely, and achieving 90% satisfaction

• Software Development Engineer in Test October-2019 - June-2020

Progress Software

Description: Boosted test efficiency 80% by architecting complex end-to-end testing environment spanning databases, servers and EFK stack. Drove continuous improvement by executing rigorous regression testing to uncover defects in critical design. Achieved 99.95% application uptime by deployment of resilient microservices infrastructure on Docker/Kubernetes

• Associate Software Engineer May-2019 - September-2019

Accenture

Description: Troubleshot critical system errors and provided effective solutions to improve stability and minimize downtime for business-critical operations. Increased efficiency and strengthened problem-solving abilities by streamlining troubleshooting processes, remediating applications, and providing technical support through testing of new onboarding strategies.

CERTIFICATION

- Python by Hackerrank 2023
- Introduction to Scrum Master Training by LearnQuest 2022
- Data Analytics Essentials by Coursera 2022
- Fintech Foundations & Applications of Financial Technology by University of Pennsylvania 2022

EDUCATION

- Masters degree in Master in Management from NEOMA Business School 2021 - 2023
- Masters degree in Master in Science from NEOMA Business School 2021 - 2023
- Bachelors degree in Bachelor of Technology from Karunya University 2015 - 2019

LANGUAGES

- English - native
