Having 1+ Years of IT experience in the implementation of Data warehousing concepts in Cloud & on-prem platforms using tools like SQL Server, Azure Synapse Analytics, and programming language like Python.

INDUSTRIES: Ecommerce, Healthcare

TECHNICAL SKILLS

• Azure Data Factory	1 years
• Azure Synapse Analytics	1 years
• Azure Data Bricks	1 years
• Azure SQL DB	1 years
• Python	1 years
• Pyspark	1 years

SOFT SKILLS

Teamwork, Problem-solving, Time management

PROJECT DETAILS

• MICKIESOFT

Project Description: Merge all the different Database tables with same schema into a single table in a single server to reduce the cost incurred to save the data for easy updation in the future
Responsibilities: Understanding the business decision and requirements. Creating an ADF pipeline for appending the 3,00,000 source tables from around 900 databases that have the same table names into 350 tables. Development of advanced SQL queries and Stored procedures to append the source tables and copy them into the destination database and trigger the process daily in Azure logic app. Establishing the connection of Azure SQL database to Power Bi for preparing the BI report as per the client requirements.
Technologies: Azure SQL DB, Azure Data Factory, Azure Logic Apps & Sendgrade
Industry: Ecommerce

• EIT Health care

Project Description: Companies from various geographic location collaborated to generate a automated process based Employee Performance Report to determine the output quality and take necessary action based on the performance
Responsibilities: Extracting raw files from the various lines of business, creating data pipelines and applying various metrics and aggregation and loading. Providing the final cleansed data to the downstream application. (Power BI) to analyze the agent's performance and make critical decisions for the business.
Technologies: Azure Synapse Analytics, Azure Data Lake & SQL DB
Industry: Healthcare

EMPLOYMENT HISTORY

• Software Developer

Description: Develops information systems by designing, developing, and installing software solutions. Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions. Develops software solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes. Accomplishes engineering and organization mission by completing related results as needed.

CERTIFICATION

- DP-900: Microsoft Azure Data Fundamentals by 0
- AZ-900: Microsoft Azure Fundamentals by 0

EDUCATION

- Bachelors degree in B.E EEE from K.S.R College of Technology 2015 - 2019

LANGUAGES

- English - advanced
