Having 1 Year of IT experience in the implementation of Data warehousing concepts in Cloud & on-prem platforms using Microsoft Business Intelligence tools like SQL Server, Azure Data Factory and programming languages like Python.

INDUSTRIES: Ecommerce, Healthcare

TECHNICAL SKILLS

• Azure Data Factory	1 years
• Azure Data Bricks	1 years
• AZURE SYNAPSE ANALYTICS	1 years
• CORE JAVA	1 years
• HTML	1 years

PROJECT DETAILS

• MICKIESOFT

Project Description: Merge all the different Database tables with same schema into a single table in a single server to reduce the cost incurred to save the data for easy updation in the future
Responsibilities: Understanding the business decision and requirements. Creating an ADF pipeline for appending the 3,00,000 source tables from around 900 databases which has same table names into 350 tables. Development of advance SQL queries and Stored procedures to append the source tables and copy into the destination database and trigger the process daily in Azure logic app Establishing the connection of Azure SQL database to Power Bi for preparing the BI report as per the client requirements.
Technologies: Azure SQL DB, Azure Data Factory, Azure Logic Apps & Sendgrade
Industry: Ecommerce

• EIT HEALTH CARE

Project Description: Companies from various geographic locations collaborated to generate a automated process-based Employee Performance Report to determine the output quality and take necessary action based on the performance
Responsibilities: Extracting raw files from the various lines of business, creating data pipelines and applying various metric and aggregation and loading. Providing the final cleansed data to the downstream application. (Power BI) in order to analyze the agent performance and make critical decisions for Business.
Technologies: Azure Synapse Analytics, Azure Data Lake & SQL DB
Industry: Healthcare

EMPLOYMENT HISTORY

• Software Developer

Description: Develops information systems by designing, developing, and installing software solutions. Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions. Develops software solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes. Accomplishes engineering and organization mission by completing related results as needed.

CERTIFICATION

- DP-900: Microsoft Azure Data Fundamentals by 0
- AZ-900: Microsoft Azure Fundamentals by 0

EDUCATION

- Masters degree in MCA from ANJALAIAMMAL MAHALINGAM ENGINEERING 2018 - 2020

LANGUAGES

- English - intermediate
