I have over 5 years of professional experience in iOS development, specializing in iOS frameworks and tools. With expertise in iOS development, I have a deep understanding of the intricacies involved in creating high-quality mobile applications for iOS devices. Throughout my career, I have worked extensively with iOS frameworks, leveraging their capabilities to develop robust and feature-rich applications. I am well-versed in using Xcode, starting from version 10 up to the latest releases, which allows me to efficiently build and debug iOS applications. I stay up-to-date with the latest trends and advancements in the iOS ecosystem to ensure that I am leveraging the most relevant tools and techniques in my work. In terms of operating systems, I am proficient in developing applications for iOS 12 and above, as well as macOS 10.14 and above. This comprehensive knowledge enables me to cater to a wide range of devices and ensure compatibility across different iOS versions. When it comes to programming languages, I am highly skilled in Swift, which is the primary language for iOS app development. Swift's modern syntax and powerful features allow me to write clean and efficient code, leading to better app performance and maintainability. Additionally, I have experience with Flutter, a cross-platform framework, which enables me to develop applications that run on both iOS and Android platforms. In terms of designing frameworks, I am proficient in SwiftUI and UIKit. SwiftUI, Apple's declarative framework, allows for faster and more intuitive user interface development, while UIKit provides a robust foundation for building sophisticated and custom UI components. With my diverse skill set and extensive experience, I have successfully delivered numerous iOS applications, ranging from small-scale projects to large enterprise-level solutions. I am passionate about creating user-friendly and visually appealing applications that provide a seamless experience for iOS users. Overall, my goal as an iOS developer is to leverage my expertise and knowledge to deliver high-quality applications that meet the needs and expectations of users while adhering to industry best practices and the latest iOS standards.

INDUSTRIES: Finance

TECHNICAL SKILLS

• Swift	5 years & 2 months
• SwiftUI	5 years
• UIKit	5 years & 1 months
• Watch OS	5 years
• Xcode	4 years
• Flutter	1 years

SOFT SKILLS

Problem-solving, Time management, Teamwork, Communication

PROJECT DETAILS

• Tradetips

Project Description: TradeTipsTM is a new approach to stock market investing for average investors and active traders.
Responsibilities: I worked as an iOS developer, primarily focused on TradeTips Projects. My responsibilities involved creating and maintaining diverse features and functionalities for the TradeTips mobile application on iOS devices.
Technologies: Swift, Stream Chats, Stripe, Sendbird, Firebase
Industry: Finance
Link: https://apps.apple.com/us/app/id1500107937

• My Ooredoo (Myanmar)

Project Description: My Ooredoo App enables you to take charge and be in control of your Ooredoo Myanmar Prepaid Account. It is available in Myanmar and English language, 24 hours a day for your convenience. With My Ooredoo App, you can: Keep track of your Ooredoo account balance, Top Up your phone, Buy our packs and services, Check your active packages, Locate our stores etc.
Responsibilities: My responsibilities primarily involved creating and maintaining various features and functionalities for the My Ooredoo mobile application on iOS devices. Additionally, I handled bug fixing and other related tasks.
Technologies: SWIFT
Industry: Finance

EMPLOYMENT HISTORY

• Senior iOS Developer

Description: As an iOS developer, my primary responsibility is to create and maintain various features and functionalities for mobile applications specifically designed for iOS devices. In addition to this, I also handle bug fixing and other related tasks. Here are the key roles and responsibilities in my work: iOS Development: I work on designing and implementing features for iOS applications, ensuring they are user-friendly, efficient, and compatible with the latest iOS versions. Feature Development: I collaborate with the development team to understand project requirements and translate them into functional features within the iOS application. Code Implementation: I write clean, well-structured, and maintainable code using programming languages such as Swift or Objective-C, adhering to coding best practices and architectural guidelines. User Interface (UI) Design: I contribute to creating visually appealing and intuitive user interfaces, working closely with designers to ensure the app's aesthetics and usability meet the project's objectives. Bug Fixing and Troubleshooting: I identify and resolve software defects and issues by conducting thorough debugging, testing, and problem analysis. I also provide timely support and solutions for any critical issues that arise.

EDUCATION

• Bachelors degree in CSE from RGPV 2014 - 2018

LANGUAGES

• English - advanced
