As a Versatile Full Stack Developer with nearly two years of dedicated expertise in MEAN stack technologies, I've honed my skills in crafting seamless user experiences and building robust backend systems. My journey in web development has been marked by a passion for frontend design coupled with a deep understanding of backend development intricacies. Throughout my career, I've excelled in API creation and optimization, leveraging my proficiency in cloud services to ensure scalable and efficient solutions. My approach to problem-solving is rooted in creativity and innovation, constantly seeking out new ways to enhance projects and drive success. With a solid foundation in both technical proficiency and creative problem-solving, I am eager to bring my talents to a dynamic team environment. Whether it's in a Full Stack or Angular Developer role, I am committed to making meaningful contributions and fueling the success of innovative projects.

INDUSTRIES: Music

TECHNICAL SKILLS

• CSS	2 years
• Linux	1 years & 5 months
• Angular	1 years & 5 months
• JavaScript	1 years
• MongoDB	1 years & 9 months
• HTML	1 years & 9 months

SOFT SKILLS

Problem-solving, Communication

PROJECT DETAILS

• PLUS MRSS July-2022 - October-2022

Project Description: MRSS PLUS is collective management system which is designed to simplify the process of purchasing music licenses, managing customers, executives, performa invoices, tax invoices, quotations, roles, transactions, receipts etc.
Responsibilities: Developed MRSS Plus, a collective management system with diverse modules as full stack developer Implemented visual analytics in the Dashboard module using Chart.js. Contributed significantly to the development of Quotation, License, Request, Users, and Reports modules. Integrated request flows and crafted scalable APIs, concurrently optimizing reports using MongoDB Aggregation Pipelines. Executed diverse interceptors (e.g., Token, Error) and created essential services (Auth Guards, API, Auth, Helper), ensuring robust security, error handling, and modular code structure. Leveraged ChartJs, Angular, Node.js, Express, and MongoDB to architect and implement robust functionalities.

• PPL Website October-2022 - February-2023

Project Description: PPL Website is CMS based dynamic website, which is managed by its cms panel where user can perform crud operations on the content.

Responsibilities: Contributed to the development of PPL Website, a CMS-based platform as a full stack developer. Led frontend development for diverse modules, including Users, Members, Rights, Roles, Songs, and Web Content. Implemented an efficient song search module leveraging Typesense, distinguished for its user-friendly design. Positioned as a superior open-source alternative to Elasticsearch and Algolia, enhancing search capabilities. Implemented functionality to synchronize SharePoint files with Typesense using Microsoft Graph API in the PPL Website project.. Created dynamic list views, grid views, search filters, and tabs for improved user interaction. Led the creation of the database schema, design, and models, establishing a robust foundation for data management. Utilized aggregation pipelines to craft APIs for generating insightful reports, enhancing data analytics capabilities. Expertly utilized Angular, Node.js, Express, MongoDB, Typesense, and ngx-datatable for streamlined module development in the PPL Website project.
