• Freight transport and courier management marketplace, Australia

Project Description: This portal is one of the biggest courier companies in Australia.
Responsibilities: I was involved in the creation of their internal sales and inventory tracking mobile application as well as frontend development along with other team members. My major developed part in that project is development of an entire mobile application for their sales and inventory integration of different couriers i.e courier please, Fastway, TNT. Along with that I have an integration live tracking facility and worked on multiple features on the admin side.
Technologies: React.js, React Native
Industry: Transportation

• Rymnder application

Project Description: This app is designed to create a communication hub for schools to save hundreds of staff and admin hours. Increase school, parents, staff and student engagement.
Responsibilities: -Development of the app admin from scratch using React js and React Native. - Create components for different features and integrate APIs. - Integration of third party services. - Managing all the tasks in Asana by assigning that to respective team members. - Discussion and planning of the new features with other team members and manager.
Technologies: React Native, React js(For user interface website), Laravel(For API), Google firebase, mySql
Industry: Education
