Expertise with React Native, API Development Familiar with Websocket, Payment gateways Used Xampps, Wamp servers Extremely strong analytical capabilities, as well as a thorough understanding of the Software Development Life Cycle (SDLC). Proficient with Windows, UNIX, Linux and React Native, and Android native Hands-on Experience with Mongo, And Realm Experienced in managing project requirements and ensuring that each project is completed on time. Rich experience in the design and development of numerous components such as tab bars, map views, image pickers, date pickers, push notifications, sign-in/out features, profile management, and navigation. Experience on a SaaS-based product for Global IT Management Software, e-Commerce Applications, Hospitality, and Food Management Software, and other domain applications. Outstanding interpersonal and communication abilities. Understanding functional specifications and providing creative solutions to suit business requirements are among my specialities.

INDUSTRIES: Finance, Communications and Media, Travel

TECHNICAL SKILLS

• Node.js	6 years & 2 months
• API Development	6 years & 5 months
• Web App Development	6 years & 2 months
• React Native	5 years & 6 months
• React	5 years & 5 months

SOFT SKILLS

Communication, Clientmanagement, Problem-solving, Teamwork, Empathy

PROJECT DETAILS

• Application for Trading & exchanging cryptocurrency. June-2018 - November-2018

Project Description: This application will provide us with the best fit for trading & exchanging cryptocurrency. One can easily buy and sell their crypto or digital assets against fiat currencies through this trading platform. This also enables users to learn about market trends and price action via detailed price action charts. Server: Xampp

Responsibilities: Develop and maintain mobile applications using React Native framework. Write clean, efficient, and reusable code for mobile applications. Collaborate with cross-functional teams (designers, product managers, backend developers) to gather requirements and translate them into technical specifications. Participate in code reviews to ensure code quality, adherence to best practices, and performance optimization.

Technologies: React-native

Industry: Finance

• Real-time Chat Application with WebSockets August-2021 - July-2022

Project Description: This project aims to build a real-time chat application where users can send and receive messages instantly. WebSockets will be utilized to establish a persistent, bidirectional communication channel between the server and the clients, allowing real-time message updates. Key Features: User registration and authentication: Users can create accounts, log in, and authenticate themselves to access the chat application. Chat room creation: Users can create chat rooms or join existing ones to engage in conversations. Real-time messaging: Users can send and receive messages in real-time, with updates instantly reflected in the chat interface. Message history: The application will store and display the chat history, allowing users to view previous messages. User presence: The system will indicate the online/offline status of users to show their availability for chat. Notifications: Users will receive notifications for new messages or when mentioned in a chat room. Server: Xampp

Responsibilities: Develop and maintain mobile applications using React Native framework. Write clean, efficient, and reusable code for mobile applications. Collaborate with cross-functional teams (designers, product managers, backend developers) to gather requirements and translate them into technical specifications. Participate in code reviews to ensure code quality, adherence to best practices, and performance optimization. Troubleshoot and debug issues in mobile applications, identifying and implementing effective solutions. Ensure the responsiveness, performance, and usability of mobile applications across various devices and platforms.

Technologies: React-Native, Websocket

Industry: Communications and Media

• Travels June-2020 - July-2021

Project Description: Plan and enjoy the perfect trip with India’s #1 Fastest- Growing Luxury Travel Agency. Join over 1 lac, happy travelers, using T3 Travel to book flights, get the best hotel deals, and plan memorable holidays. Where i have used Payment gateway and Cart functionalities for Booking and payment

Responsibilities: • Write clean and efficient code following established coding standards and guidelines. • Use debugging tools and perform unit testing to ensure the application's functionality and stability. • Collaborate with backend developers to integrate the mobile application with server-side technologies. • Optimize application performance by analyzing and improving code efficiency and implementing caching mechanisms. • Stay informed about security practices and implement secure coding techniques to protect user data. • Participate in code reviews and provide constructive feedback to team members.

Technologies: React-Native

Industry: Travel

EMPLOYMENT HISTORY

• Full stack development

Description: Project gathering, Project development, Designing , Deliver, Testing, Team management, Distribute task to teams

EDUCATION

• Bachelors degree in IT from Gtu 2014 - 2017

LANGUAGES

• English - advanced
