As an Associate Software Engineer, I have spearheaded frontend development in an Agile environment, utilizing my skills in Angular, HTML, CSS, and JavaScript to deliver responsive and dynamic web applications. During my tenure from September 2022 to July 2023 at BIGTAPP ANALYTICS PVT LTD, I closely collaborated with cross-functional teams to ensure alignment with project goals and timelines. Prior to this, I gained hands-on experience in web application development as a trainee from March 2022 to September 2022. I have also worked on projects such as an online yoga teaching platform and a gym portfolio, enhancing user engagement and accessibility. My technical prowess extends to Python, SQL, Bootstrap, Angular Material UI, Git, and Adobe Photoshop

INDUSTRIES: My own project, College project
