+91 9820045154 | hr@augmntx.com

Experienced SQL DBA adept at optimizing database performance and ensuring data integrity. Proven expertise in database design, maintenance, and performance tuning. Skilled in query optimization, monitoring, and collaboration. Eager to contribute success.

INDUSTRIES: Information Technology, IT

TECHNICAL SKILLS

• Python	2 years & 3 months
• SQL Server	2 years & 3 months
• SQL	2 years & 3 months
• POWER BI	2 years & 3 months
• Tableau	2 years & 3 months

SOFT SKILLS

Teamwork, Communication, Problem-solving, Time management, Critical thinking

PROJECT DETAILS

- Hpi

Project Description: Our project focuses on establishing and maintaining robust database systems while efficiently managing server infrastructure both on-premises and in the cloud. The primary objectives include ensuring data integrity, optimizing performance, and facilitating seamless access for users. Additionally, the project entails proactive monitoring, troubleshooting, and implementing backup strategies to safeguard critical data.
Responsibilities: As a key member of the project team, my responsibilities revolve around database management and server deployment. Specifically, my role includes:Leading the creation and management of databases, ensuring they meet project requirements and performance standards.Implementing access controls and user management protocols to safeguard data confidentiality and integrity.Configuring and monitoring maintenance tasks to optimize database performance and reliability.Proactively identifying and troubleshooting database issues to minimize disruptions to operations.Overseeing server deployment across on-premises and cloud environments, leveraging expertise in AWS services and ServiceNow for efficient task management.
Technologies: Sql server
Industry: Information Technology

• Ticket analysis

Project Description: Our project centers around analyzing the work of each team member through the tickets they handle. The primary objective is to identify trends, patterns, and individual performance metrics to enhance efficiency and productivity within the team. By systematically tracking the types of tickets each team member works on and the time taken to resolve them, we aim to generate insightful reports on a monthly basis.

Responsibilities: Within this project, my role primarily involves:Developing a robust system for capturing and categorizing tickets, integrating with existing ticketing systems if applicable.Implementing algorithms or methodologies to accurately measure the time taken to resolve each ticket.Designing and generating comprehensive monthly reports that showcase individual team members' performance metrics.Collaborating with team leads and stakeholders to interpret the findings from the reports and identify areas for improvement.Iteratively refining the analysis process based on feedback and evolving business requirements to ensure the reports remain relevant and actionable.

Technologies: Excel

Industry: IT

EMPLOYMENT HISTORY

• SQL Server DBA

CERTIFICATION

• Microsoft Azure administrator by Microsoft 2023

• Power bu by Udemy 2023

EDUCATION

• Bachelors degree in Mechanical engineering from KLE institute of technology Hubli 2017 - 2021

LANGUAGES

• English - advanced
