Frontend-focused full-stack engineer with a proven ability to design, develop, and deploy high-quality web applications using a variety of technologies. Passionate about leveraging my technical skills, collaborative abilities and stakeholder management expertise to develop elegant solutions to real-life problems.

INDUSTRIES: Non Profit, Sports

TECHNICAL SKILLS

• JavaScript	1 years
• Ruby on Rails	1 years
• React	1 years
• HTML5	1 years
• CSS3	1 years

SOFT SKILLS

Communication, Teamwork, Stakeholder Management, Problem-solving

PROJECT DETAILS

• Albina Community Archive

Project Description: Cultural archive of Portland, OR's historic Albina neighborhood
Responsibilities: Enhanced the World Arts Foundation Rails/React project and improved the organization of the archive's expanding database by updating JavaScript and Rails dependencies and refactoring much of the codebase, cutting record upload time by 50%. Optimized UX for archivists, stakeholders, and the interested public to secure additional funding by developing a role-authorized CMS, and refining the project’s data infrastructure. Decoupled the Rails/React monorepo as a Rails CMS and API, and a client-side NextJS app.
Technologies: React, Next, Ruby on Rails
Industry: Non Profit
Link: https://www.albinacommunityarchive.org/

• DriftCast

Project Description: Conditions forecasting app for PNW anglers ready to hit the water
Responsibilities: Implemented my vision for intuitive and responsive design patterns using TailwindCSS based on Figma wireframes. Further centered user experience and security by implementing JWT authentication and custom server-side JavaScript to handle and store file uploads in AWS SDK. Restructured the data object returned by the USGS API to make critical data user-accessible.
Technologies: MongoDB, Express, Node, React
Industry: Sports
