I am a curious and dedicated engineer that brings a unique blend of critical thinking, problem- solving, communication, and organizational skills honed over six years as a project manager, digital marketer, and database administrator. These skills, coupled with my technical understanding of MERN/SERN stacks and eagerness to continue learning new technologies makes me a valuable candidate that will exceed the expectations set by your organization.

INDUSTRIES: Event Management, Gaming, Social Media

TECHNICAL SKILLS

• JavaScript	10 months
• React	10 months
• Node.js	10 months
• SQL	10 months
• Cloud Platforms	10 months

SOFT SKILLS

Problem-solving, Critical thinking, Communication, quick learner

PROJECT DETAILS

• Fellowship Finder November-2023 - November-2023

Project Description: Fellowship Finder simplifies organizing tabletop game sessions.
Responsibilities: Initialized Cloudinary and MySQL DBMS allowing users to upload images to a global feed. Utilized Sequelize ORM to provide filtering capabilities based on event or user. Created a responsive photo layout with MUI fluid grids and React.
Technologies: mySQL, Axios, Express, Node, React, MUI, Sequelize, Cloudinary
Industry: Event Management

• Dogagatchi November-2023 - November-2023

Project Description: Dogagatchi combines trivia and caretaking elements for an immersive dog-owning experience.
Responsibilities: Configured MongoDB Atlas to reduce the deployed instance size and simplify testing. Employed React with Axios requests to trigger Express request handling that utilized Mongoose to store, retrieve, update, and delete user data to display up to date user information immediately.
Technologies: MongoDB Atlas, React, Axios, Express, Bootstrap, Mongoose
Industry: Gaming

• WHSPR November-2023 - January-2024

Project Description: WHSPR strips away superficiality leaving an engaging, auditory social media experience.

Responsibilities: Employed PostgreSQL and Sequelize ORM to track user interaction with posts categorized by hashtags to engineer a ranking algorithm in Express request handling to curate personalized feeds based on the user's engagement. Created a suite of HTTP requests with Axios allowing users to react, comment, and share. Leveraged React Bootstrap components and SASS mixins to develop reusable and cohesive components achieving a distinctive aesthetic by incorporating glassmorphic design. Ensured an engaging interface by incorporated transitions and animations using CSS. Configured Webpack to bundle TypeScript, TSX, HTML, and SCSS to generate static assets.

Technologies: PostgreSQL, React, TypeScript, Sequelize, Express, Axios, SASS, Bootstrap, Express, Node

Industry: Social Media
