PROJECT DETAILS

• Lightning

Project Description: This application is all about designer lighting project management. It is a platform which automates user luminaire specifications, making more time for innovative designs. Lighting designers use specialized tools for their specifications as well as their drawings. This application is used to match your design needs with quality products from renowned lighting manufacturers, or to easily specify bespoke lighting. Each user specifies a lighting scheme for an architectural, interior design or development project. Users can search the library and select various filters like length , color , dimension , CRI according to their project design. It gives Detailed information from well known high-end manufacturers all shown in the same way so users can quickly find what they need. Users can also compare products and add products to their designing project Export documents to specially designed templates, or create their own templates to align with your practice's look and feel.
Responsibilities: Work as a Lead developer and handle the key responsibilities of the project.
