I m a passionate Blockchain Developer with extensive experience in developing production level projects. I m a quick learner and a team player. I have been a great asset to my projects and want to learn and grow as a great software developer.

INDUSTRIES: Crypto Fintech, Blockchain Fintech

TECHNICAL SKILLS

• React	4 years
• Solidity	3 years & 5 months
• Node.js	3 years
• Solana	2 years
• Python	2 years
• AWS	2 years

PROJECT DETAILS

• Payonramp — September-2023 - March-2024

Project Description: Payonramp.com It is a D2C crypto transfer project where a retail user can deposit fiat currency and get equivalent crypto token with fractional platform fees incurred. Viceversa crypt to fiat withdrawals also works.
Responsibilities: I have worked on spot trading feature integrating OKX APis to get mealtime value of token-network pairing mealtime value. And drafted the architecture for perpetual swaps. • Spot trading and perpetual swap transactional throughput increased by 40% and new perpetual trading also gaining traction with the users
Technologies: Solidity, Node, React, AWS
Industry: Crypto Fintech
Link: https://www.payonramp.com

• omoney.io — January-2023 - January-2024

Project Description: It is a B2B payments solution platform catering to Gaming companies needs. It provides with onboarding Gaming company as a merchant, so that it can make seamless transactions to its retail users. Both Fiat and Crypto Transfers are provided by the platform
Responsibilities: I delivered the crypto payments settlement solution by integrating the Fiat-Crypto paring or 2 Crypto token pairing, Fetching the realtime data using Binance APIs, integrations using Web3JS and creating Smart contracts using Solidity, deployed on Polygon Mainnet. • Streamlined onboarding by spearheading payment gateway development, resulting in 30% increase in efficiency.Achieving high throughput and low transactional cost for smart contract deployment.
Technologies: React, Solidity, NestJS, AWS, SQL
Industry: Blockchain Fintech
