# Srungarapu G

ML Engineer, 10+ years experience
Hyderabad, India
https://augmntx.com/profile/ml-engineer-srungarapu-g/axf15489

AugmntX
+91 9820045154 | hr@augmntx.com

With over a decade of dedicated experience in software engineering, I have consistently demonstrated proficiency in the full software development lifecycle, from meticulous analysis and innovative design to flawless implementation and adept troubleshooting. My expertise extends to the intricacies of backend architecture crucial for cutting-edge web-scale applications.

**INDUSTRIES:** Ecommerce, FinTech

## TECHNICAL SKILLS

| | |
|---|---|
| • Python | 10 years |
| • Python | 10 years |
| • Python | 7 years |
| • Django | 7 years |
| • Microservices Architecture | 7 years |
| • Microservices | 7 years |
| • RESTful | 5 years |
| • GCP | 3 years |
| • Data Pipelines | 3 years |
| • Data Modeling | 3 years |
| • Docker | 2 years |
| • Kubernetes | 2 years |
| • Vertex Pipelines | 2 years |
| • airflow | 2 years |

## SOFT SKILLS

Problem-solving, Teamwork, Time management

## PROJECT DETAILS

• Machine Learning Model Deployment for Revenue and Sales Forecasting — October-2023 - March-2024

Project Description: Successfully deployed machine learning models to forecast future revenue and sales, providing critical insights for data-driven decision-making. ➢ Leveraged advanced techniques to fine-tune models for optimal performance and accuracy, contributing to revenue growth
Responsibilities: Evaluating the feasibility and benefits of transitioning existing Airflow DAGs to Vertex AI pipelines, exploring opportunities to further enhance data processing efficiency and scalability for machine learning tasks.
Technologies: python, pyspark, vertex pipelines,airflow, gcp
Industry: Ecommerce

• Recommendation Algorithm for Commercial Vehicle Insurance November-2021 - January-2023

Project Description: Developed and implemented a sophisticated recommendation algorithm tailored to the insurance domain. This algorithm effectively suggests the best insurance match for commercial vehicles based on user requirements. This innovation led to improved customer satisfaction and increased business efficiency

Responsibilities: I am creating an algorithm. Interact with business to understand new integrations to the algorithm estimation

Technologies: Python, Django, Microservices, Algorithm Designing

Industry: FinTech

## EMPLOYMENT HISTORY

• ML Engineer

• Lead engineer December-2019 - January-2023

Turtlemint

## EDUCATION

• Masters degree in Information Technology from JNTU Hyderabad 2012 - 2014

## LANGUAGES

• English - native
