I am a certified Mulesoft and salesforce engineer with expertise in CRM, Integration, Development & Implementation. I am involved in developing SF Integration with the LWC components, Rest APIs, triggers, flow, VF pages, and Email Templates. Also, used declarative tools such as Flows and security processes.

INDUSTRIES: Ecommerce, Automobile

TECHNICAL SKILLS

• Salesforce CRM	6 years
• Lightning Web Component	6 years
• Apex	6 years
• Trigger	6 years
• Mulesoft	2 years

SOFT SKILLS

team leader, analytical, communication

PROJECT DETAILS

• Streamline October-2018 - November-2019

Project Description: Mobile app uses Salesforce as backend. Most of the works done here to connect Mobile app to Salesforce via rest api in a high trust environment using a connected app. Also in the Salesforce backend batch, schedule jobs, visualforce page for pdf rendering, few components were used. Triggers were used in some cases and few aura components were there. Declarative tools used as per requirements.
Responsibilities: I was involved there to develop those pieces above with my co-workers specially the rest apis and batches.
Technologies: salesforce, aura, triggers, visualforce
Industry: Ecommerce

• VHUB February-2022 - May-2023

Project Description: Salesforce org for recon tech services where it detects damages of the vehicles through mobile and web app. It uses click-ins named ai service via api and connected to the SF through the web app. Then it creates estimates and work orders and then creates invoices. The whole process is divided based on the individual customers and SF acts as a hub for them to run their business separately.
Responsibilities: :I was involved there to develop the SF piece which includes Rest apis, triggers, flow(Record triggers and screen), LWC components, VF pages for rendering pdfs etc.
Technologies: ,SalesforceRest apis, triggers, flow, LWC components
Industry: Automobile

• Astech June-2020 - January-2022

Project Description: Salesforce org for automobile company to manage their business via mulesoft to other legacy (SQL servers) systems. It uses FinancialForce to generate sales invoices to sync with the other connected systems.
Responsibilities: Project Role:I was involved there to develop mule applications to act as a bridge between SF and other systems. I got certified in mulesoft at that time but that is the only project I got a chance to work with Mulesoft. I needed to create rest apis in the SF end as well.
Technologies: salesforce, mulesoft, rest api
Industry: Automobile

• GirdXpress May-2023 - February-2024

Project Description: Appexchange Lightning component bundle for enhancing Salesforce List/Related List/Kanban View/ Record Layout/ Object Timeline with features such as Inline editing, Export/Import, Mass Create/Update/Clone/Delete, Filters, 360 and Split view, Custom configs etc.
Responsibilities: reate/Update/Clone/Delete, Filters, 360 and Split view, Custom configs etc.
Technologies: apex, lightining component,
Industry: Ecommerce

• MS Rau Antiques October-2019 - April-2020

Project Description: Salesforce org was integrated with Shopify, where the product catalogs were from the Salesforce system. A complex aura component was used to update product catalogs individually and in bundle and then integrate with shopify accordingly.
Responsibilities: I was involved there to develop those pieces above with my co-workers specially to integrate with shopify and the aura component.
Technologies: Salesforce, aura, triggers, shopify
Industry: Ecommerce
