Mentoring, Problem-solving, Critical thinking

PROJECT DETAILS

• AD Manager Plus — September-2019 - November-2021

Project Description: SaaS application to manage Active Directory objects like user, computer, and their accesses.
Responsibilities: This is a big application that has multiple code stack. I get to work on all the modules mainly to deliver features and fix bugs on demand by customers
Technologies: Java Servlet, ember js, venila js, .net API's
Industry: Software and Platforms
Link: https://demo.admanagerplus.com/

• Crew Portal — March-2024 - March-2024

Project Description: A SaaS application for the airline industry. Act a single page to view all the tasks assigned to airline employees.
Responsibilities: Initially worked on the singled tenant, and implemented multiple features there. While moving to multitenant get to architect(system design) new standards by referring open source repositories which prioritise scalability and code refactoring. And mentor others on the new standard.
Technologies: MEAN Stack, .net, Flutter
Industry: Software and Platforms
