• Node.js	4 years & 3 months
• Express.js	4 years
• Next JS	3 years & 5 months

PROJECT DETAILS

• AccelEvents

Project Description: Accelevents is an all-in-one event management platform for virtual, hybrid, and in-person events. Accelevents provide functionalities like chatting with another user, creating meetings with another user, making calls, purchasing tickets, entering virtual event hub to join and register sessions, sending push notifications to the user, etc.
Responsibilities: - Implement newly designed pages in react. - Create new components based on requirements and integrate APIs to make it dynamic. - Implement A/B tests using a 3rd party JavaScript based testing tool - Develop project scope, timelines, and tasks working closely with the product and delivery management teams
Technologies: ReactJs, Java Spring Boot, SQL
Industry: Event Management

• CarnivalWhitelabel

Project Description: They are basically digital guides for tourists with information and attractions like food, culture, shopping, etc., synced with Google Maps and Places API for images, maps, and working hours info. There's also a PDF offline version the guest can download to their device and use it onboard if they don't have Internet access on the ships.
Responsibilities: - Development of the system from scratch using react frontend. - Create components for different features and integrate APIs. - Integration of third party services for supply chain management. - Managing all the tasks in Asana by assigning that to respective team members.
Technologies: ReactJs, Nodejs, MongoDB
Industry: Travel

• Sallis

Project Description: SALLIS makes the company formation procedures in the UAE easy; that's our thing. You can form your UAE company, issue visas, and get the best support to open a bank account all online. Our web portal allows you to incorporate your company and fulfill its needs conveniently. With Sallis, it is a painless, fast, and efficient process.
Responsibilities: - Migration of their old system to the new technology stack includes React.js, Redux, Typescript, Material UI etc. - Discussion and planning of the new features. - Creation of a roadmap for their systems in JIRA Kanboard and assignment of the task to respective members.
Technologies: ReactJs
Industry: Finance
