Senior software engineer with over 10 years of experience in software development, design, and implementation of backend restful services. Proven success in developing, debugging, and maintaining high-performance software solutions. Experienced in all facets of the software development lifecycle.

INDUSTRIES: Various Industries, Real Estate, Healthcare

TECHNICAL SKILLS

• JSON	10 years
• JavaScript	10 years
• Node.js	10 years
• ExpressJs	8 years
• RESTful Apis	8 years
• MongoDB	5 years
• KoaJS	5 years
• Typescript	5 years
• Rust	4 years
• Microservices	3 years

SOFT SKILLS

mentoring, collaboration

PROJECT DETAILS

• Web Applications Development — October-2014 - Present

Project Description: Developed web applications using Node.js, Angular, and RethinkDB, improving user experience and performance by 30% with optimized codebase. Mentored junior staff to increase code quality and collaboration while delivering 10+ projects across multiple industries.
Responsibilities: Built and maintained RESTful microservices and automated the deployment process, reducing the deployment time by 80%. Contributed to software design decisions to ensure product scalability and sustainability, providing key support to the engineering team.
Technologies: Node.js, Angular, RethinkDB
Industry: Various Industries

• Real Estate Financial Investor App — April-2013 - October-2014

Project Description: Developed a Ruby On Rails app for a Real Estate Financial Investor to allow clients to sign up and submit properties for investors to review and invest in.
Responsibilities: Designed and implemented RESTful APIs utilizing JSON for data transfer and responding to client requests for content, data, services, and other information. Configured servers using Nginx, and DigitalOcean for advanced web hosting capabilities delivering high start-up speeds and scalability.
Technologies: Ruby On Rails
Industry: Real Estate

• HIPAA Compliant Digital Twin October-2022 - December-2022

Project Description: Provide doctors and Fitness influencers a way to track their health care and fitness programs impact.
Responsibilities: Design and implement microservices to handle connecting to a HIPAA compliant, encrypted datastore for tracking user health statistics on their digital twin.
Technologies: NodeJS, AWS, Lambda, Postgres, Tozny
Industry: Healthcare

EMPLOYMENT HISTORY

• Principal Software Engineer (Backend) October-2022 - December-2022

Description: Developed new features on the backend, using Node.js and TypeScript, to improve system reliability and reduce latency by 40%, resulting in improved operational efficiency.

• Senior Software Engineer (Backend) March-2018 - February-2019

FlinkTO
Description: Developed secure and efficient RESTful APIs for social media platform, enhanced system throughput up to 40%, reduced latency by 70%, and improved scalability up to 60%.

• Software Engineer April-2013 - October-2014

Ittybam
Description: Developed a Ruby On Rails app for a Real Estate Financial Investor to allow clients to sign up and submit properties for investors to review and invest in. Developed an adult website using WordPress to allow customers to browse models and videos and make purchases. Developed an Android application to to allow users to insert emoji images into text messages.

• Junior Web Developer July-2012 - March-2013

Peaceful Computing
Description: Helped develop web applications using CakePHP for CAT equipment rental companies. Helped develop Inspection applications for Android and iOS devices using Phonegap for CAT equipment rental companies. Created website frontend layouts from Photoshop design wireframes.

• Principal Software Engineer (Backend) October-2014 - Present

Gravity Web
Description: Worked on a variety of projects ranging from Wordpress deploys and plugin development to a custom reservation app using NodeJS, Angular and RethinkDB,

EDUCATION

• School degree in Computer Science from St. Charles Community College 2010 - 2012

LANGUAGES

• English - native
