I am a Python Developer with a passion for coding problem-solving. I am familiar with various frameworks and libraries such as Flask, Django, Django Rest, Numpy and Pandas. With a collaborative mindset and strong communication skills, I can brainstorm ideas and work towards innovative solutions.

INDUSTRIES: Ecommerce, EdTech, Automation, Consumer Goods and Services, Automotive

TECHNICAL SKILLS

• Python	2 years
• Django	1 years & 6 months
• Django REST Framework	6 months
• Flask	1 months
• FastAPI	1 months

PROJECT DETAILS

• Zonvids June-2022 - November-2022

Project Description: ZonVids.com is a video generation platform that facilitates placements on Amazon Live and UGC (User Generated Content) videos for Amazon Listings. ZonVids also supports video creation for other social media channels including YouTube, TikTok, and Instagram.
Responsibilities: I discussed with client regarding the features and created a document for that. We decided the technology and once everything is finalized, I developed a whole project from scratch. There are still some minor changes that I am doing.
Technologies: Django, Celery, RabbitMQ
Industry: Ecommerce
Link: https://zonvids.com

• Visual Space June-2022 - November-2022

Project Description: Visual Spaces allows you to connect with other designers to create your project and visualise how your future home will look like
Responsibilities: I discussed with Product team regarding the new feature and accordingly, I developed the back-end APIs as per requirements. Also, discussed with front-end developer how to integrate that API. We have 1 developer as front-end and 1 developer as mobile developer. So, I explained APIs detail to them and done the modification as per their suggestions.
Technologies: Django Rest, AngularJs
Industry: EdTech

• InsuranceXdate February-2022 - June-2022

Project Description: There are all customer's insurance scrapped details which one buys insurance from InsuranceXDate sites and finds insurance company details and lead scrubbing process for cleaning all details like email, name, phone number, etc. After cleaning data, move into the Spreadsheet. This leads is useful for contact with insurance claimed persons

Responsibilities: I discussed with client regarding the features and created a document for that. We decided the technology and once everything is finalized, I have done the development in python using selenium and scrapy to srcape the customer data. Once I got the data, I did the cleaning and created spreadsheet. This was automated process and running on every day.

Technologies: Python, Scrapy, Selenium

Industry: Automation

• Royal Gems January-2024 - February-2024

Project Description: Royal Gems, a foremost diamond manufacturer and distributor devoted to conveying magnificent luminosity and enduring grace. Royal Gems is an emerging name in the CVD diamond industry. WE OFFER ALL SHAPE OF DIAMONDS CVD TYPE IIA. Our company, with innovative advances in technology and research, focuses on creating perfection

Responsibilities: This is a informative website for diamond manufacture company. I discussed with client regarding how he wants the website and based on that I explained the designer team to create design. Once design is created, I integrated the with the django.

Technologies: Django

Industry: Consumer Goods and Services
