Experienced Full Stack developer with a proven ability to create dynamic websites and advanced web applications. Skilled in problem-solving and taking ownership of projects, I excel in harnessing cutting-edge technologies like JavaScript, React.js, Node.js, and Express.js to deliver seamless digital experiences. Proficient in React Native and Next.js, I thrive on tackling frontend and backend challenges, contributing to scalable and efficient systems. My role involves working with new technology, ensuring exceptional global user experiences by driving innovation in both front-end and back-end architecture. Suitable for both freshers and experienced professionals.

INDUSTRIES: Real Estate, Entertainment

TECHNICAL SKILLS

• React	2 years & 2 months
• HTML5 & CSS3	2 years & 8 months
• Node.js	1 years & 6 months
• Express.js	1 years & 6 months
• MongoDB Atlas	1 years & 5 months

PROJECT DETAILS

• Leasington API — March-2023 - June-2023

Project Description: Streamlining data visualization is paramount in today's data-centric world. To facilitate this, we've developed a robust API coupled with powerful chart creation functionality in the backend. This integrated solution empowers users to effortlessly generate insightful charts directly from their data, all while seamlessly storing these visualizations in Azure Storage for easy access and sharing.
Responsibilities: Implemented ng2-charts for server-side rendering and developed logic for word cloud creation - Generated optimized graphs and word cloud image on the backend - Optimized integration with Azure Storage for seamless functionality - Ensured comprehensive error handling, logging, and documentation for future reference
Technologies: Express.js, Node.js, D3-charts, SQL, Azure
Industry: Real Estate

• ConnectFm — October-2022 - December-2022

Project Description: "Connect FM" is an innovative online platform that seamlessly blends the immersive experience of a live radio channel with comprehensive news coverage, creating a dynamic destination for users seeking real-time updates and engaging content.
Responsibilities: My role in the project was instrumental in implementing crucial functionalities, particularly focusing on integrating APIs to dynamically fetch and display content. Additionally, I spearheaded the implementation of Server-Side Rendering (SSR), optimizing performance and ensuring swift loading times across various devices and network conditions.
Technologies: Reactjs, Expressjs, MUI, React redux
Industry: Entertainment
