With more than 15 years of experience in the IT industry, I am a skilled developer, with a proven track record of developing and deploying web applications and DevOps tools and techniques. I lead and mentor a team of developers, ensure quality and timely delivery, and facilitate stakeholder collaboration and communication. I am always eager to learn new technologies, explore new challenges, and contribute to the success of my team and organization. I am a passionate and certified agile leader and coach, who helps teams and organizations adopt agile values, principles, and practices, and deliver high-quality software solutions to their customers. I hold multiple certifications from ICAgile, Scrum Alliance, Kanban University, and others, demonstrating my expertise and commitment to continuous learning and improvement.

PROJECT DETAILS

• FHunger

Project Description: A digital channel that allows stores to sell food and connect with a wider audience. By setting time-bound deals, stores can ensure that surplus food is quickly sold, rather than wasted. Our user-friendly app enables stores to manage inventory and set offers in real-time. Customers can easily place orders, pay through Fhunger app, pick-up, and enjoy their delicious food.
Responsibilities: Designing the architecture of the application, database design, Square payment gateway integration, team handling, client interaction
Technologies: Ruby on Rails, AWS, Postgresql, Square payment gateway
Industry: Food Delivery

• SILO

Project Description: Independent Contractor Drivers are the heart of SILO Association. From long haul trucking to last mile, we are serving professional drivers.
Responsibilities: Designing the architecture of the application, database design, team handling, client interaction
Technologies: Ruby on Rails, AWS, Postgresql
