I'm skilled in React Native with a focus on user-centric interfaces, REST API integration, Redux app management, and Firebase engagement. My passion for AI innovation drives me to excel in mobile app development and create seamless user experiences.

INDUSTRIES: Healthcare, Communications and Media

TECHNICAL SKILLS

• Android Studio	3 years
• Visual Studio Code	3 years
• JavaScript	2 years
• Manual Testing	1 years
• React Native	3 months

SOFT SKILLS

Creativity, Adaptability, Attention to Detail, Communication

PROJECT DETAILS

• Hospital Management System — May-2023 - August-2023

Project Description: Mad2x is a mobile client application built using React Native that allows users to book doctor appointments easily and conveniently. The app leverages various libraries and dependencies to provide a seamless user experience.
Responsibilities: Designing app architecture and UI. Implementing state management and database integration. Ensuring authentication, API integration, and backend connectivity. Debugging, testing, and optimizing app performance. Collaborating with team members and documenting code. Preparing the app for deployment and ongoing maintenance.
Technologies: React-native
Industry: Healthcare
Link: https://github.com/Jigar-Gadhia/mad2x

• Music App — August-2023 - August-2023

Project Description: A music app to search and stream any music available in the database.
Responsibilities: Designing intuitive UI for search and streaming. Integrating music APIs and handling data. Implementing seamless audio streaming and controls. Managing app state using Redux. Testing, optimizing performance, and error handling. Collaborating with designers and backend developers. Documenting code and preparing for deployment.
Technologies: React-native
Industry: Communications and Media

EMPLOYMENT HISTORY

• Software Tester — January-2023 - February-2023

Description: My responsibilities included testing software modules, documenting and reporting issues, collaborating with developers, tracking issue resolution, retesting after fixes, maintaining documentation, ensuring software stability, contributing to process improvement, and adhering to industry standards.

EDUCATION

• Bachelors degree in Computer from GTU 2019 - 2022

LANGUAGES

• English - intermediate
