+91 9820045154 | hr@augmntx.com

Experienced Full Stack Developer with over 4 years of expertise in crafting responsive and visually engaging user interfaces using React.js, enhancing overall user experience. Proficient in seamlessly integrating and managing APIs and backend data sources to ensure smooth data flow within web applications. Implements caching strategies and asynchronous processing to optimize application efficiency. Ensures web application reliability through rigorous testing and collaboration with QA engineers. Creates and maintains detailed technical documentation for effective communication and knowledge sharing. Stay updated with emerging technologies and best practices in both front-end and back-end development. Plays a key role in delivering highly responsive and scalable web applications aligned with business objectives. Committed to exceeding user expectations by prioritizing an exceptional user experience in web interfaces.

INDUSTRIES: Healthcare, Logistics

TECHNICAL SKILLS

• React.Js	4 years
• AngularJS	4 years
• Node.js	4 years
• GraphQL	4 years
• MongoDB	4 years

SOFT SKILLS

Communication, Problem-solving

PROJECT DETAILS

• Onko

Project Description: Onko is an ally throughout cancer treatment, delivering bespoke health improvement programs to the palm of your hand. This unique approach combines the connectivity and intelligence of technology with the support of healthcare professionals to ensure the very best results. Technology allows for frequent education, ongoing understanding and connected care to help you achieve the best quality of life and the fastest route to recovery. Onko service ensures you are not only supported but personally empowered, energized and motivated.
Responsibilities: Established a clean code architecture for scalability and maintainability. Developed thorough unit test cases for code reliability. Implemented Redux for effective state management. Prioritized a mobile-first approach for responsive design. Customized a text editor to project specifications. Addressed cross-site scripting (XSS) vulnerabilities to enhance security. Integrated a real-time chat support system. Added drag-and-drop functionality for improved user interactions.
Technologies: React, Next.js, Redux, NodeJS, Express.js, MYsql, Redis, AWS
Industry: Healthcare

• ShapShap

Project Description: ShapShap is a logistics marketplace that enables fast and efficient transportation of goods and parcel delivery services. It also allows users to shop for goods from nearby stores on the app and have them delivered to their doorstep. ShapShap also connects users to their favorite shops and restaurants for food delivery to their homes.

Responsibilities: Handled complex math for the admin tasks. Added Google Maps to the app. Making sure that the app communicates securely between the front and back ends. Designed a very polished and user-friendly interface. Set up who can do what in the app for different users. Added a way for users to pay in the app. Set up a way for customers to talk to the admin right away. Worked on different cms portal to manage different vendors

Technologies: React.js, Node.js, Next.js, Golang, GraphQL, Rest APIs, Firebase, Docker, Express.js, MongoDB, Redux, Typescript

Industry: Logistics

• Loadmee

Project Description: Loadmee is an app-based logistics service provider which offers an easy, reliable and economical way to book loading vehicles based on their capacity. We cater services to almost all types of businesses, whether they are B2B or B2C. Loadmee is addressing inefficiencies of last-mile logistics & redefining the existing goods movement around the city and between the cities.

Responsibilities: Understanding the project requirements, discussing them with stakeholders, and translating them into technical specifications. Creating the overall system architecture and designing the software components, user interfaces, and application logic. Integrating external services, such as payment gateways, mapping services, and social media platforms, into the application to enhance its functionality. Identifying and resolving performance issues, optimizing code for speed and efficiency, and implementing caching and other techniques to improve the application's overall performance.. Managing the version control system, ensuring code integrity, and overseeing the deployment process to ensure the smooth release of new features and updates.. Collaborating with team members, communicating project progress, and coordinating with stakeholders to ensure that the project meets their expectations and requirements. Ensuring that the project follows coding standards, best practices, and industry regulations to maintain the quality and reliability of the software. Working on strategies to ensure that the application can handle increased traffic and data loads, implementing scalability measures, and conducting performance testing to optimize the application's performance under various conditions.

Technologies: Angular.js, Node.js, Next.js, Golang, GraphQL, Rest APIs, Firebase, Docker, Express.js, MongoDB, Redux, Typescript

Industry: Logistics

EMPLOYMENT HISTORY

• Fullstack Developer

Description: 4+ years of experience in Full Stack Development. Crafting responsive and visually engaging user interfaces using React.js to optimize the overall user experience. Seamlessly integrating and managing APIs and backend data sources to ensure smooth data flow within web applications. Implementing caching strategies and asynchronous processing to enhance application efficiency. Maintaining web application reliability through rigorous unit and integration testing. Collaborating with QA engineers for issue resolution and delivering a high-quality end product. Creating and maintaining detailed technical documentation for code, APIs, and integration processes. Staying updated with emerging technologies and best practices in both front-end and back-end development. Playing a key role in delivering highly responsive and scalable web applications that align with business objectives. Commitment to creating web interfaces that exceed user expectations, prioritizing an exceptional user experience.

EDUCATION

• Bachelors degree in Engineering from RGPV 2015 - 2019

LANGUAGES

• English - advanced
