+91 9820045154 | hr@augmntx.com

Experienced mobile app developer proficient in a wide range of programming languages including Flutter, Android, Dart, Kotlin, and Java. Specializes in modern Android frameworks such as Jetpack Compose and FlutterFlow, with a strong understanding of design patterns like MVC, MVP, and MVVM. Advocates for Test-Driven Development (TDD) principles and has developed mobile libraries for API consumption.

INDUSTRIES: Healthcare, FinTech, Marketplace

TECHNICAL SKILLS

• Android	6 years
• Java	5 years
• Flutter	5 years
• Dart	5 years
• Kotlin	3 years

SOFT SKILLS

Communication, Teamwork, Critical thinking, Problem-solving

PROJECT DETAILS

• SafeAP

Project Description: SafeAP is the community platform linking users with verified non surgical aesthetic practitioners. Discover nearby practitioners and easily book slots that suit your schedule for aesthetic procedures. Our platform ensures a seamless and secure booking process, connecting you with top-notch independent practitioners. Trust SafeAP for your aesthetic needs and experience a hassle-free way to enhance your beauty.

Responsibilities: Incorporated Java for efficient notification management and robust analytics, enhancing the overall user experience. Implemented Image Tagging to effectively categorize and manage customer diseases, providing a structured approach to healthcare data. Integrated Socket.io to enable seamless and real-time chat functionality, fostering instant communication between users. Introduced Schedule functionality, allowing users to manage appointments on an hourly basis for a more organized and structured workflow. Utilized Google Maps integration to provide users with the ability to locate and navigate to doctor clinics, enhancing accessibility and convenience.

Technologies: Android, Java

Industry: Healthcare

• BePanda

Project Description: BePanda is a platform for managing all the subscriptions in one place so that it becomes easy for the user to have access to all the subscriptions where they can pause, renew and cancel the subscription as per their need. The marketplace will give users more to explore and get the best deals, where the user can compare the pricing of the different subscriptions. Users can also track their Spend, Category, and Transaction analysis of each activity, so if the monthly or annual spending is high, they can pause or cancel the subscription as per their preference. The app is all about tracking and managing your recurring costs to ensure you are getting value for money.

Responsibilities: Enabled seamless connectivity by integrating Buds for linking user bank accounts and enhancing financial transactions within the application. Implemented an additional layer of security by integrating Security Shield, allowing users to manage fingerprint authentication for unlocking the application. Established a versatile Marketplace, facilitating the purchase of products directly within the application for enhanced user convenience. Streamlined the user onboarding process by integrating Google and Apple sign-in functionalities, offering users multiple options for a hassle-free login experience. Introduced a Subscription Management system, empowering users to efficiently manage their subscriptions. Users can easily cancel or pause their subscriptions, providing greater flexibility and control over their account preferences.

Industry: FinTech

• RDI

Project Description: Rated Driving Instructor is the platform that ensures you find the best driving instructor for your needs. Our app offers a transparent and user-friendly way to search and rate driving instructors, helping learners make informed choices. With detailed instructor profiles, customer reviews, and safety records, you can trust that you're in good hands. Say goodbye to the guesswork and hit the road with confidence by choosing a Rated Driving Instructor. It's your journey, your choice, and your safety matters.

Responsibilities: Collected educational content, including math exercises, tutorials, and study materials from various sources and educational providers. Ingested user data, including user profiles, preferences, and academic progress, while ensuring data privacy and security. Transformed and structured educational content to fit the app's learning modules, ensuring data consistency and relevance. Standardized and preprocessed user data to facilitate personalized learning experiences and recommendations. Maintained databases or data stores to efficiently store user data, educational content, and app-related information. Implemented data partitioning and indexing for optimized data retrieval and performance. Developed systems to track and record user progress, such as completed exercises, quiz scores, and time spent on specific topics. Calculated and stored user performance metrics to provide personalized feedback. Implemented data quality checks and monitoring to identify and address data anomalies, ensuring exercises and content accuracy. Ensured that the app can scale to handle increasing user loads and deliver content with minimal latency Collected and analyzed user feedback and interactions to make data-driven improvements to the app's features and content.
