With a decade of focused expertise in SAP technologies like BAPI, BADI, Smart Forms, ALV, and ALV with OOPS, coupled with adeptness in data migration utilizing BDC and LSMW, I offer a robust foundation in SAP systems. Proficient in S/4 HANA, CDS Views, AMDP, and Hana Views, I navigate complex data structures with ease. My repertoire includes mastery in Data Dictionary Objects, Module Pool Programming, and Cross-Applications such as ALE/IDOCs, RFC, and BAPI. Skilled in enhancement techniques like BADI and EXIT, I optimize system performance using methods like Runtime Analysis and Parallel Cursor Mechanism. Equipped with debugging prowess and familiarity with Proxy, I ensure seamless system operation. Beyond SAP, I swiftly adapt to technologies like Core Java, JavaScript, HTML, and SQL. My commitment to agile methodologies, demonstrated through Sprint Planning, Backlog Balancing, and Team Metric Analysis, underscores my collaborative spirit and communication proficiency, making me an invaluable asset to any organization.
