• AI Avatar Historical Event — December-2023 - April-2024

Project Description: AI Avatar Historical Event Platform is a student-friendly space where students can interact with avatars representing historical events. These avatars respond to students' questions with video responses, complete with facial expressions and spoken dialogue.
Responsibilities: Developed the frontend and backend using Node.js and React with TypeScript. Implemented authentication functionality for signing in and signing up via email on the backend. Designed sections for Avatars, Points of Interest (POI), events, and Historical Projects, which can be managed by the admin. Generated a publicly accessible timeline based Historical Project url , displaying events and all mapped POIs and Avatars for each event.
Technologies: Python
Industry: Education

• OneAi Chat January-2021 - April-2024

Project Description: OneAI-Chat is an AI aggregation platform with multimodal offerings, distributed in focused categories.
Responsibilities: Integrated third-party OpenAI APIs and custom AI APIs into React with Node.js. Integrated multiple payment gateways, including Billdesk, Stripe, and PhonePe.
Technologies: Python
Industry: Education
