Problem-solving

## PROJECT DETAILS

• Cordiant Asset Solutions

Project Description: Investment Banking Client: Cordiant Capital Inc., Canada. Investment banking domain project specifically under the equity ,there are the brokerage charge for every transaction .when trading of equity and derivatives being investors for increasing their capital cost and if they don’t have any idea about trading then they will approach to the investment banking.We have multiple like billions of investors using the service and each and every investor may have tread in different stock and may in equity and derivatives.So, keeping a track of all these transactions manage can be tedious and error prone task. To manage the transaction in the proper way we have developed a capital management system according to our customer requirements which is a platform where investors can see the all stock details and buy and sell the stock and also see the all details in a systematic manner. This project will leverage keen understanding of the characteristics of the most successful business models and management teams in a given sector to engage meaningfully with potential investors.The structuring group, adept at developing tailored capital solutions, ensures that transactions meet the rigorous standards set by our demanding investment team. Through the interplay of these seasoned groups, investment selection is underpinned by a rigorous and scenario-based approach to risk.
