| • Next.js | 1 years |

## SOFT SKILLS

Communication, Teamwork, Problem-solving, Time management, Critical thinking

## PROJECT DETAILS

• E-commerce Website

Project Description: Developing a multilingual e-commerce platform supporting English and Thai languages.
Responsibilities: Implement user authentication and session management to allow customers to securely log in and shop for items on the e-commerce platform. As a frontend developer, tasks include updating existing codebase to improve functionality, fix bugs, and enhance user experience. Additionally, creating new modules using Next.js, while ensuring seamless integration with the existing system
Technologies: Next.js
Industry: Ecommerce

• Admin Panel

Project Description: Enhancing an existing admin panel for an e-commerce platform using Next.js. Admin Panel contains products list , Recommended Products , Shop/Suppliers , Product tags and reward points earned by logged-in users upon purchasing products
Responsibilities: Responsibilities in creating the Admin Panel for a Next.js project include designing the user interface, developing reusable components, implementing features such as user management, content management, integrating with backend APIs, ensuring data security and access control, optimizing performance, and collaborating with the team for testing and documentation. Responsibilities include ensuring smooth CRUD operations, and integrating authentication mechanisms
Technologies: Next.js , TypeScript
Industry: Ecommerce

• Clinic Website

Project Description: Create two login portals: one for clinics and another for patients. Patients should be able to access a list of clinics, view specific clinic's doctors, and check their availability.
Responsibilities: Additionally, patients should be able to book appointments with specialist doctors, with functionalities for adding and updating appointments. In the clinic login portal, clinics should be able to access a list of patients and view their appointment details with doctors. They should also be able to check the list of doctors along with their availability. My responsibility is to develop components, integrate APIs, handle authentication, ensure responsiveness, and collaborate with teams for testing and documentation
Technologies: React js, Material UI, Form Control, Yup Validations, Fuse Theme
Industry: Healthcare

• Student Academic Website

Project Description: Developing a student academic website aimed at providing comprehensive educational resources and facilitating seamless communication between students and faculty
Responsibilities: As a frontend developer, responsibilities include designing and implementing the frontend interface using React js, integrating backend services for user authentication and database management, and ensuring cross-browser compatibility and responsive design
Technologies: React js, Material UI, Form Control, Yup Validations, Fuse Theme
Industry: EdTech

• Plastic Company Website

Project Description: The Plastic Company Website aims to present the company's products and services
Responsibilities: It includes sections for product catalogs, company profile, and contact forms. As a frontend developer, tasks involve creating the website's layout with HTML and CSS, implementing interactivity and animations using JavaScript, and ensuring cross-browser compatibility and responsiveness.
Technologies: HTML , CSS, Javascript
Industry: Ecommerce

• ViewTube

Project Description: ViewTube Religion is a specialized video-sharing platform catering to religious content uploaded by administrators for viewing and engagement. Admins upload religious videos, accessible to users who can view, like, comment, and download them.
Responsibilities: Users can sign up and receive notifications whenever a new video is uploaded by the admin. As a frontend developer, responsibilities include UI design and API integration tailored for religious video content, implementing user authentication, and ensuring content moderation
Technologies: React js, Material UI
Industry: Ecommerce

• Website

Project Description: Creating an IT company website showcasing services, portfolio, and team information.
Responsibilities: Designing and developing website layout with HTML and CSS, ensuring compatibility across devices. Implementing interactive elements and animations using JavaScript for enhanced user experience
Technologies: HTML, CSS, Javascript
Industry: Ecommerce

• Cactus Plant Selling Website

Project Description: Developing a cactus plant selling website featuring a variety of cactus species, care guides, and online purchasing options
Responsibilities: Built using HTML, CSS, and JavaScript to ensure a visually appealing and user-friendly experience. Designing and implementing the website's layout and styling with HTML and CSS, prioritizing responsive design. Integrating interactive features such as product galleries and checkout functionality using JavaScript.
Technologies: HTML, CSS, Javascript
Industry: Ecommerce

## EMPLOYMENT HISTORY

• Senior React JS Developer

Description: Working as Senior React JS developer

## EDUCATION

• Bachelors degree in Computer Engineering from Gujarat Technological University 2014 - 2017

## LANGUAGES

• English - advanced
