I am a certified designer and I earned my bachelor's degree in Graphic Design. I have worked with many companies and offer quality work. Not only that, but I provide the highest quality services and my purpose is to provide quality design solutions that you will need to complete your projects. My expertise is to complete all types of work that are related to visual design. Whether that work is Interface design, brand identity design, packaging design, or anything else I can do quickly. I am available to solve your problem with my skills and experience.

INDUSTRIES: Ecommerce, Healthcare

TECHNICAL SKILLS

• Visual Designing	4 years
• User Testing	4 years

SOFT SKILLS

Critical thinking

PROJECT DETAILS

• Jakarta Flowers

Project Description: Project Description: It is a web marketplace where they sell flowers and gifts in 6 different countries.

Responsibilities: In this project I gathered and analyzed business requirements to understand their needs and goals. I then created wireframes and prototypes to test and refine user interfaces. I also designed the final user interface, including layout, typography, color, and imagery. I worked with engineers to implement the user interface and conducted user testing and usability studies to ensure it was effective and efficient. I used the latest design principles and technologies. Gather and analyze user requirements to understand user needs and goals. Create wireframes and prototypes to test and refine user interfaces. Design the final user interface, including layout, typography, colour, and imagery Work with engineers to implement the user interface Conduct user testing and usability studies to ensure the user interface is effective and efficient. Stay up to date on the latest design trends and technologies.

Technologies: Figma, Miro, Whimsical

Industry: Ecommerce

• Cureasy

Project Description: It is a Healthcare service app where they provide health care services at user's doorstep.

Responsibilities: Responsibilities: I understood the business case and interviewed the client and healthcare experts to understand their pain points and come up with relevant solutions. Collaborating with engineers was essential, and I conducted user tests for usability. Staying updated on design trends was vital, while also addressing user demographics, accessibility, and regulations. Working with healthcare experts ensured accuracy. In essence, I played a pivotal role in enhancing healthcare apps, focusing on user-friendly experiences for improved care and health management. Gather and analyse user requirements to understand user needs and goals Create wireframes and prototypes to test and refine user interfaces. Design the final user interface, including layout, typography, colour, and imagery. Work with engineers to implement the user interface. Conduct user testing and usability studies to ensure the user interface is effective and efficient. Stay up to date on the latest design trends and technologies.

Technologies: Figma, Miro

Industry: Healthcare
