With 4 years of expertise in React and Next.js frameworks, I excel in crafting sophisticated web applications, content management systems (CMS), and web services. I am proficient in server-side rendering (SSR) and single-page applications (SPA), I specialize in seamless deployment and code management with GIT. My skills encompass pixel-perfect design and ensuring cross-device/browser compatibility. As a leader, I conduct thorough code reviews and thrive in dynamic, deadline-driven settings, backed by strong communication and interpersonal skills.

INDUSTRIES: Ecommerce, Admin dashboard, Textile Ecommerce

TECHNICAL SKILLS

• JavaScript	4 years
• TypeScript	4 years
• React	4 years
• Node.js	4 years
• Express.js	4 years
• Firebase	4 years
• MySQL	4 years
• MongoDB	4 years

SOFT SKILLS

Communication, Teamwork, Problem-solving

PROJECT DETAILS

• FAST KART

Project Description: Fastkart offers a cutting-edge e-commerce experience with a sleek React Next 14 frontend. Its intuitive interface and advanced features, such as advanced filtering and sticky "Add to Cart" functionality, elevate user engagement. The platform prioritizes user privacy with GDPR compliance and enhances visibility with Google Rich Snippets. With support for multiple languages/currencies, transparent shipping options, and customizable layouts, Fastkart sets the standard for modern e-commerce.
Responsibilities: creating a cutting-edge e-commerce experience with a sleek React Next 14 frontend, incorporating advanced features like filtering and sticky "Add to Cart" functionality, ensuring GDPR compliance, implementing Google Rich Snippets, supporting multiple languages/currencies, providing transparent shipping options, and enabling customizable layouts.
Technologies: React js, Next js
Industry: Ecommerce

• MULTI KART

Project Description: The latest React project, supported by Bootstrap 5 and Saas, offers cutting-edge features tailored to modern web development needs. Utilizing React CLI, it ensures efficient development workflows, while its RTL layout support enhances accessibility for diverse audiences. Developed with React 18.2.0 and node 18.16.1, it boasts stability and compatibility with the latest technologies. Integrated Paypal Gateway facilitates seamless transactions, while 12 color options and translation readiness allow for customizable and user-friendly interfaces. With support for multiple currencies and a Sass processor for CSS, it caters to global audiences and enables easy styling. The project features pagination and infinite scrolling for streamlined navigation, ensuring a responsive design and high resolution for optimal viewing on various devices. Additionally, it includes blog pages and a host of other functionalities to meet the demands of modern web applications.

Responsibilities: leveraging React 18.2.0 with Bootstrap 5 and Sass to create advanced, accessible, and customizable web applications featuring RTL support, PayPal integration, multiple currencies, pagination, infinite scrolling, and responsive design.

Technologies: REACT JS

Industry: Ecommerce

• CUBA ADMIN

Project Description: Developed with Bootstrap 5x, React Js, and NEXT, this admin template boasts cutting-edge technologies for seamless performance. With versions tailored for React 18.2.0 and NEXT 13.1.5, it ensures compatibility and optimization. Styled with SASS and HTML with PUG, it offers versatility in customization. Featuring Gulp for efficient workflow, it includes 5 distinct dashboards, along with light, dark, and box templates. With multiple color options and a fully responsive layout, it caters to diverse design preferences. Font Awesome icons, detailed documentation, and clean, well-commented codes enhance usability and ease of development. W3C validated code ensures compliance with web standards, while data table export options, charts, multi-file upload, and range sliders provide robust functionality for data management and visualization.

Responsibilities: As a developer for this admin template, my responsibilities include utilizing Bootstrap 5, React 18.2.0, NEXT 13.1.5, SASS, and PUG to create versatile, fully responsive, and W3C-validated dashboards with multiple color options, seamless data management features, and clean, well-documented code.

Technologies: REACT JS & NEXT JS

Industry: Admin dashboard

• TEXTILE E-COMMERCE APPLICATION

Project Description: Our React js stack-based Textile E-commerce application offers a seamless shopping experience with robust features. Users can securely authenticate using JWT, manage profiles, and explore a comprehensive product catalog with search functionality. The responsive interface ensures smooth navigation across devices, while the shopping cart and checkout process, along with dynamic delivery charges, streamline purchases. Wishlist functionality allows for future reference, and integrated payment gateways ensure secure transactions. Order management features enable users to track purchases, while admins can manage roles, permissions, orders, and shipments. With its modern technology stack, our platform delivers scalability, performance, and security for textile shopping needs.

Responsibilities: As a developer for our React.js-based Textile E-commerce application, my responsibilities include implementing secure JWT authentication, user profile management, comprehensive product catalog exploration, responsive design, seamless shopping cart and checkout processes, dynamic delivery charges, wishlist functionality, integrated payment gateways, order tracking, and robust admin management for roles, permissions, orders, and shipments.
