I am a highly skilled Full Stack Python Developer with four years of experience in designing and building dynamic web applications. Proficient in both front-end and back-end development, I specialize in using React.js for creating responsive user interfaces and Python frameworks such as Django and Flask for developing robust server-side applications. My expertise extends to database management with MySQL, PostgreSQL, and MongoDB, as well as implementing RESTful APIs and integrating third-party services. Committed to delivering high-quality, scalable solutions, I excel in problem-solving, debugging, and collaborating effectively with cross-functional teams.

INDUSTRIES: Banking, Consumer Goods and Services, Software and Platforms

TECHNICAL SKILLS

• Python	5 years & 2 months
• Django	5 years & 2 months
• Node.js	5 years & 2 months
• React.Js	5 years & 2 months
• FastAPI	5 years & 2 months
• Docker	5 years & 2 months
• AWS	5 years & 2 months
• JavaScript	3 years & 2 months

SOFT SKILLS

Communication, Problem-solving, Time management, Teamwork

PROJECT DETAILS

• HDFC Life99

Project Description: Life99 is a platform where your most pertinent retirement needs are fulfilled . It is a one-of-akind platform that provides you with a single view of all your investments, along with providing a clear idea of whether you are truly retirement ready. The platform also allows you to avail customized products and services that best meet your retirement needs.I am currently working on this project as a full-stack engineer with NodeJS and ReactJS along with micro-services.
Responsibilities: experience is responsible for end-to-end development of web applications, from creating responsive front-ends to robust back-ends and managing databases, ensuring secure, scalable, and high-quality solutions.
Technologies: NodeJS, ReactJs , TypeScript , HTML, MySQL
Industry: Banking

• ArtistOnGo

Project Description: I worked on ArtistOnGo as a full-stack engineer, my work on this project is to develop he new functionality and solve the existing bugs and make the product more accurate. My work includes python (Django) as a back-end and ReactJS as a front-end.
Responsibilities: Requirement gathering ./ End-to-end Development / Testing
Technologies: Python(Django),ReactJs,TypeScript, MongoDB , AWS
Industry: Consumer Goods and Services

• CRM Builder

Project Description: Improved software development efficiency by implementing Agile methodologies and streamlining team workflows.Mentored junior developers, fostering a culture of continuous learning and skill improvement. Streamlined code review processes, improving overall code quality while reducing time spent on revisions.Built databases and table structures for web applications.
Responsibilities: Develop and integrate CRM features, manage database, and ensure security.
Technologies: Fast API ,ReactJs , TypeScript , MySQL
Industry: Software and Platforms

• Leakage detection System App

Project Description: LDS is a PC-based application designed to monitor leak detection. The application provides advanced configuration and troubleshooting tools for the connected leak detection systems through Ethernet, RS-485, and RS-232
Responsibilities: Develop, implement, and maintain the app for real-time leak detection and alerts.
Technologies: : NodeJS, ReactJs, TypeScript, Mongo DB, AWS
Industry: Consumer Goods and Services

• Phyllo Insta

Project Description: This project is about to create a Google Chrome extension for Instagram to make life easy for influencers, advertisers, campaign managers. Collaborated with product managers to define technical requirements and develop innovative solutions for complex problems. We are tracking their live data and displaying it into different graphs like engagement, follower tracking, age distribution, gender distribution, and many more, so users can see directly where they are headed and make a better decision. Designed and implemented scalable applications for data extraction and analysis. I am working on this project as a Tech Lead and full-stack developer backed as a python (Django) and Frontend as a ReactJS.
Responsibilities: Develop and optimize backend, integrate APIs, and ensure app scalability.
Technologies: Python (Django), ReactJs , TypeScript, AWS , Mongo DB
Industry: Consumer Goods and Services

• Scrapping Meesara

Project Description: Scrappping Meesara is all about scrapping a fintech and instureTech company website's calculators and download BI and get the information. We have used Python (Django), scrapy, playwright for scrapping and maintaing efficiency by django celery. I worked on this project as a tech lead and also worked as a fullback developer backend as a Python (Django) and frontend as a ReactJS.Analyzed work to generate logic for new systems, procedures and tests.Mentored junior developers, fostering a culture of continuous learning and skill improvement
Responsibilities: Develop web scraping scripts, extract data, and ensure data accuracy and integrity.
Technologies: Python (Django), ReactJs, TypeScript, AWS, Mongo DB
Industry: Consumer Goods and Services

EMPLOYMENT HISTORY

• Full Stack Python Developer

Description: A Full Stack Python Developer with 4 years of experience is responsible for end-to-end development of web applications, from creating responsive front-ends to robust back-ends and managing databases, ensuring secure, scalable, and high-quality solutions.

EDUCATION

• Masters degree in MCA from Gujarat University 2017 - 2020

LANGUAGES

• English - advanced
