Gupta V

Software Developer, 3+ years experience
Gurugram, India
https://augmntx.com/profile/software-engineer-gupta-v/axo1949

+91 9820045154 | hr@augmntx.com

Expertise in modern web architecture using various advanced JavaScript frameworks and libraries like Node.js, React.js/Redux, React Native, Bootstrap, Ember.js, Responsive web design (RWD). Working experience on ES5, ES6, ES7 and Typescript features for handling asynchronous data requests. rong experience in developing MERN (MongoDB 3x, Express.js, React.js and Node.js). Experienced in building cross browser compatibility applications using HTML5 and CSS3. Hands on expertise on Redux, Flux, Webpack JavaScript based applications Hands on expertise in developing the Single Page Applications (SPAs) using React.js Strong in developing RESTful APIs using Node JS to offer an easy and safe way to build high performance and scalable network application. Experienced in designing Using Web Standards. Hands on experience with build tools such as webpack and Grunt. Expertise in Client Side designing and validations using HTML, DHTML and Java Script Hands-on experience of Node JS, Express JS, and Mongo DB along with Mongoose.JS to create server-side applications. Good experience with the version controls GIT, GITHUB, Bit Bucket.

INDUSTRIES: Software and Platforms, Home appliances control

TECHNICAL SKILLS

• React Native	3 years
• MongoDB	3 years
• Github	3 years
• JavaScript	2 years & 5 months
• Redux	2 years & 5 months

SOFT SKILLS

Communication

PROJECT DETAILS

• CEMITS

Project Description: CEMITS is a dynamic Aggregator App designed to deliver users the most current information and rapid updates concerning productivity enhancement solutions and services.CEMITS stands out with its integration of Agora's powerful video call functionality. By seamlessly incorporating Agora's technology, users can initiate high-quality video calls, enabling real-time communication and enhanced engagement.
Responsibilities: Roles and responsibilities: -integrating API and creating design - fixing bugs
Technologies: React native, redux, firebase, Google map, agora
Industry: Software and Platforms

• Papper

Project Description: Developed an IoT device app that enables seamless communication and control between mobile devices and Internet of Things (IoT) devices. Created a robust Node.js backend to facilitate efficient data processing and device interaction. Integrated APIs into React Native applications, ensuring smooth data exchange and functionality. Utilized Mobx for state management, enhancing the app's responsiveness and user experience.

Responsibilities: Integrated APIs into React Native applications, ensuring smooth data exchange and functionality. Utilized Mobx for state management, enhancing the app's responsiveness and user experience. Integrated Firebase to provide push notification capabilities, enhancing user engagement and interaction.

Technologies: React Native, Mobx, Firebase, Husky, Git, IoT, Android, Node Role

Industry: Home appliances control

EMPLOYMENT HISTORY

• Software Engineer

Description: Designing and maintaining software systems. Evaluating and testing new software programs. Optimizing software for speed and scalability. Writing and testing code. Consulting with clients, engineers, security specialists, and other stakeholders.

EDUCATION

• Bachelors degree in Computer Application from University of Allahabad 2017 - 2020

LANGUAGES

• English - advanced
