+91 9820045154 | hr@augmntx.com

I'm a good at learning and troubleshooting. Handle things very well. Handled many high-level projects and learned a lot of new things from these. Hope ill suit in your requirement

INDUSTRIES: Consumer Goods and Services, Human Resources

TECHNICAL SKILLS

• SQL Server DBA	11 years
• Performance Tuning	11 years & 1 months
• Always on	11 years & 1 months
• CLUSTERING	11 years & 1 months
• Troubleshooting	11 years & 1 months

PROJECT DETAILS

• Tempur Sealy August-2019 - October-2022

Project Description: The new state-of-the-art plant is expected to be the largest Tempur Sealy manufacturing facility in the world and will be located in Crawfordsville, Indiana. Subject to closing conditions, the construction on the 130-acre site is expected to begin in the third quarter of 2021. Rendered Image of New Tempur Sealy Foam-Pouring Plant in Indiana. This new facility's location in the Midwest complements the Company's existing manufacturing footprint and is expected to enhance the Company's ability to service its Northeast customers. The first phase is planned for approximately 700,000 square feet, with the ability to double its capacity over time and to expand to a final size of approximately 1 million square feet in the future, which would make it Tempur Sealy's largest manufacturing facility in the world. Production is expected to begin in 2023, and Tempur Sealy plans to hire approximately 300 local employees to staff the facility. Construction will be funded from operating cash flow.
Responsibilities: Supporting Production and Development databases in 24x7 Environment. Installed and configured SQL Server in a standalone and Clustered Environment. Handled Performance Tuning and Optimization of slow running queries. Detected and resolved CPU, memory, I/O, disk space
Technologies: SQL Server
Industry: Consumer Goods and Services

• NYC HRA

Project Description: The Human Resources Administration or Department of Social Services (HRA/DSS) is the department of the government of New York City[1] in charge of the majority of the city's social services programs. HRA helps New Yorkers in need through a variety of services that promote employment and personal responsibility while providing temporary assistance and work supports. Its regulations are compiled in title 68 of the New York City Rules.
Responsibilities: Worked in Azure environment like Migration SQL databases from om premise to Azure Cloud Worked in creating Azure data factories and creating synapse by implementation and configuration. Implemented pipeline creation from Azure synapse to Data verse. Pipeline created between azure synapse to SQL database using data factories. Involved in all environments Production and Test and Dev. Having work experience with cluster environment & fail over, fail back activity @ the time of patching.
Technologies: SQL DBA
Industry: Human Resources

EMPLOYMENT HISTORY

• Sr SQL DBA

Description: ● Having 11 + years of experience in SQL Server database administration in Microsoft AZURE SQL Server as MS SQL SERVER 2008 R2, 2012,2016 (Database Administrator) ● Experience on configuring and maintaining Full backup, Transactional log backup, Differential backup and creating the maintenance plans for index rebuild, index reorganize based on fragmentation. ● Strong experience on identifying and troubleshooting database health, integrity checks and fixing them. ● Implemented Transparent Data Encryption in Production and non-production environment (TDE) ● Implemented Always On encryption in Production environment. ● Experienced in setting up high availability and DR options like log shipping, mirroring, replication (Transactional or Snapshot) and Always on Availability Groups. ● Experience in Database Migration, Migrated SQL Server 2008R2 to 2012 and to 2016. ● Well experienced in Query Optimization, Client/Server connectivity, Performance Tuning, Database Consistency Checks using DBCC utilities, DMV's. ● Experience in implementing SQL Server security and managing permission to the Database through Database roles, Creating Users and Logins. ● Hands-on experience in maintaining SQL Server Clustering (Active-Active/Active-Passive). ● Experience in troubleshooting and performance tuning by using activity monitor, performance monitor, DBCC, DMVs. ● Experienced on working with production Servers and 24 x 7 On-Call environments. ● Applied Service Packs and security updates for SQL server instances. ● Excellent verbal and written communication skills combined with interpersonal and conflict resolution skills and possesses strong analytical skills as well as flexibility to learn advancements in the IT industry.
