As a seasoned Senior Software Engineer and adept Project/Program Manager with over two decades of experience, I am dedicated to delivering client-centric solutions that exceed expectations. My track record includes designing innovative applications and effectively managing projects to achieve high client satisfaction. I am committed to staying at the forefront of technology by continually honing my technical skills and keeping abreast of industry trends.My expertise spans a wide range of areas, including requirement gathering and analysis, architectural design, component development, and interface design for client-server, web-based, workflow, and blockchain applications. I excel in object-oriented analysis and design, ensuring that solutions are not only functional but also scalable and maintainable.I bring a wealth of experience in database design, end-user training, documentation, and support, ensuring that projects are well-rounded and successful from inception to completion. My comprehensive understanding of the Software Development Lifecycle (SDLC) allows me to navigate complex projects with ease, delivering high-quality results on time and within budget.

INDUSTRIES: Finance, Supply Chain Management

TECHNICAL SKILLS

• Solidity	4 years
• JavaScript	4 years
• Ethereum	4 years
• golang	1 years
• Hyperledger Fabric	1 years

SOFT SKILLS

Problem-solving, Communication, collaboration, Time management, presentation, research

PROJECT DETAILS

• Token Exchange

Project Description: Developed a full-stack Token Exchange, a decentralized cryptocurrency application, leveraging Ethereum blockchain technology. This cutting-edge trading platform was designed to support a myriad of trading pairs, enhancing liquidity and accessibility for users.
Responsibilities: Develop complete smart contracts and Dapp, including design, coding, testing and deployment.
Technologies: Solidity, Web3, ReactJS, Redux, Javascript, HTML, CSS, Mocha, Chai
Industry: Finance

• Decentralized Supply Chain

Project Description: Developed a full-stack Supply Chain decentralized application, leveraging Ethereum blockchain technology. This cutting-edge trading platform was designed to support the end-to-end Supply Chain process.
Responsibilities: Develop a Dapp, including design, coding, testing and deployment of smart contracts and user interface
Technologies: Solidity, Web3, ReactJS, Redux, Javascript, HTML, CSS, Mocha, Chai
Industry: Supply Chain Management

EMPLOYMENT HISTORY

• Blockchain Developer, Fullstack Developer

Description: Develop smart contracts and fullstack Dapps

CERTIFICATION

- Certified Ethereum Developer by Blockchain Council 2022
- Certified Blockchain Architect by Blockchain Council 2022

EDUCATION

- Masters degree in Computer Information Systems from Cleveland State University 1990 - 1991
- Bachelors degree in Mechanical Engineering from NED University of Engineering & Technology 1980 - 1984

LANGUAGES

• English - native
