• Visual Studio 2022	3 years

PROJECT DETAILS

• usePopcorn

Project Description: This project extensively uses React Hooks, which is reflected in the project's name. Additionally, data is fetched from APIs in this project.
Responsibilities: Takes input from the user and returns a list of movies having similar titles as given in the input. On failure to do so, an error screen appears. The user can also rate the movies with his own ratings and save them in his list
Technologies: HTML, CSS, React.js, React.js Hooks
Industry: Entertainment

• Far Away

Project Description: Designed a basic functional web application using React.js and React Hooks. The application implements state management using React Hooks.
Responsibilities: Takes notes and saves them on the dashboard. The notes can be sorted in three different order. Also, have implemented a checkbox functionality to cross out notes that have been marked already.
Technologies: HTML, CSS, React.js, React.js Hooks
Industry: Entertainment

• Marketplace

Project Description: Virto Commerce is a versatile open-source B2B e-commerce platform offering scalability, modular customization, and multi-store support. It prioritizes security and is ideal for businesses of all sizes.
Responsibilities: Robust and customizable features. Virto Commerce provides a modular architecture, scalability, and secure multi-store management.
Technologies: Vue, Angular, .NET, Azure DevOps
Industry: Ecommerce

• Employee Management System

Project Description: It's a console-based application on C#. It adds, updates, and deletes the details of the employee. Assigning the project and task to the employees and calculating the task delay
Responsibilities: - Developed the core functionality for managing employee records. - Implemented features for task assignment and delay calculation. - Conducted testing to ensure application stability and accuracy.
Technologies: C#, .NET
Industry: Human Resources

• GTrade Gains

Project Description: The project was about trading in NFTs & Bitcoin as well.
Responsibilities: - Resolved responsive issues and ensured compatibility across all screens. - Handled front-end design and development. - Implemented four different UI themes as per client specifications. - Managed the project independently, ensuring timely delivery and quality.
Technologies: Laravel, API, Twilio
Industry: Trading

• Health Check Monitoring

Project Description: This solution helped our client monitor NB side projects currently by checking out their logs data by the logs tables. And then giving them a common platform to monitor their services by processing which we are getting from that into simple web applications so it can be easier to monitor them.
Responsibilities: - Developed a web application for monitoring project logs and services. - Processed and visualized logs data for easy monitoring. - Integrated the front-end and back-end to provide a cohesive monitoring platform. - Ensured real-time data updates and efficient performance.
Technologies: React JS, .NET, MS SQL
Industry: Healthcare

• Website Development

Project Description: Collaborated with insurance company to develop a fast and efficient marketplace with scalability for multiple stores and catalogs with seamless multi-language support to enhance the user experience.
Responsibilities: 1. Created a fast and efficient website that could easily scale and accommodate multiple stores and catalogs. 2. Implemented a seamless solution for adding multiple languages to the same store. 3. Enhancing the user experience for a diverse customer base.
Technologies: AngularJS, Liquid, Sass variable, .NET 5, Azure cloud
Industry: Insurance

EMPLOYMENT HISTORY

• Fullstack Developer

Description: Implemented functionality for a new SSO feature release for one of our WPF applications which resulted in a 17% increase in revenue. Design and maintain the front-end UI using React. Resolve customer issues and fix bugs on the back end using ASP.NET. Resolve customer issues, fix bugs, and execute and validate tests for WPF applications to ensure functionality, reliability, and adherence to quality standards. Utilize Azure DevOps for tracking and managing bugs, customer issues, and user stories within an Agile environment.

• Programmer Analyst May-2022 - February-2024

Cognizant Technology Solutions

Description: Made the UI design using HTML, CSS, and JS. Used WebSQL for data storage. Made a console app using C# and ADO.NET framework

CERTIFICATION

• Azure Developer Associate by Microsoft Certified 0

• Azure Fundamentals by Microsoft Certified 0

EDUCATION

• Bachelors degree in BTech in Electronics and Communication from Academy of Technology, Hooghly 2018 - 2022

LANGUAGES

• English - advanced
