SOFT SKILLS

Communication

PROJECT DETAILS

• Binery February-2023 - January-2024

Project Description: As a test engineer, I was involved in all phases of the software development lifecycle (SDLC) aligned with Agile Methodologies. Also, I worked with product managers and developers to understand the requirement management for new features and develop comprehensive testing plans. Contributed to problem definition and root cause analysis efforts as well.
Responsibilities: Developed and maintained an average of over 50 test cases per feature, encompassing 9-10 features for the product. Effectively managed these test cases with the Zypher plugin on Jira. Design, develop, and maintain automated test scripts using the automation tools such as Selenium & Cypress for testing. Well-versed with Handling Elements in Selenium & Cypress using CSS selectors.
Technologies: selenium
Industry: SaaS

• Netmente January-2023 - January-2024

Project Description: Worked on multiple frameworks like Laraval and Codeigniter, Exposure to writing, reviewing, and executing test scenarios and Test cases
Responsibilities: Collaborated with other developers to update the website and new features. Created APIs and tested them on Postman.
Technologies: testing
Industry: Software and Platforms
