Dedicated Backend developer with 5 years of hands-on experience in a corporate setting, specializing in Backend development. With a strong foundation in frontend technologies such as HTML, CSS, Bootstrap, AJAX, jQuery, LESS, SASS and JSON, I am adept at creating intuitive and visually appealing user interfaces. On the Backend, I leverage my expertise in AngularJS, Angular 2-12, and NodeJS etc to architect scalable and robust solutions that meet evolving business needs. Proficient in version control with GIT, I am well-versed in operating across multiple platforms including Windows, Mac OS, and Linux, utilizing tools like Visual Studio Code and sublime for streamlined development workflows. Additionally, I integrate Ngx-bootstrap, RXJS, Webpack, Babel and Gulp into my toolkit to enhance productivity and maintain code quality.
