Communication

PROJECT DETAILS

• 24/7 Jobs January-2021 - June-2021

Project Description: 24x7 Jobs is a platform designed to connect job seekers with employment opportunities around the clock, catering to the needs of various industries and roles. The platform offers a streamlined experience for users, with features that support quick job applications, employer interactions, and real time updates.

Responsibilities: Conduct thorough manual testing to ensure software quality and reliability. Develop and execute test plans, covering functionality, usability, performance, and security aspects. Identify, document, and track software defects, collaborating with developers for swift resolution. Continuously improve testing processes and methodologies to enhance product quality and team efficiency.

Technologies: Manual Testing

Industry: Human Resource Platform

• Hobort Shipping October-2022 - July-2023

Project Description: Hobort Shipping is a cutting-edge logistics platform designed to optimize and streamline shipping operations for businesses and individuals alike. The platform offers real-time tracking, efficient route planning, and seamless integration with multiple carriers to ensure timely and cost-effective deliveries. With a user-friendly interface, Hobort Shipping enables easy management of shipments, automated notifications, and comprehensive analytics for better decision-making. By leveraging advanced technologies, Hobort Shipping enhances operational efficiency and delivers exceptional customer service in the competitive shipping industry.

Responsibilities: Design, develop, and execute test plans to ensure software functionality, usability, and performance. Conduct manual and automated testing across applications, APIs, and databases to identify and document issues. Collaborate closely with development teams to track, analyze, and resolve software defects efficiently. Continuously enhance testing processes and methodologies to improve efficiency and effectiveness. Report on testing progress and quality metrics, providing insights to support decision-making and risk management.

Technologies: Manual Testing

Industry: Logistics

EMPLOYMENT HISTORY

• QA Engineer

Description: Ensure quality in Scrum team via manual testing, regression testing, and process improvements. Create detailed test plans to validate functionality, usability, and reliability of software applications. Conduct comprehensive manual and automated tests on web apps, APIs, and Postgres databases. Track and document software defects, collaborating with development to resolve issues promptly. Optimize testing processes and contribute to team culture through collaboration and knowledge sharing.

EDUCATION

• Bachelors degree in Mechanical from RGPV 2008 - 2012

LANGUAGES

• English - advanced
