Hello, I'm from Surat, Gujarat, India, I have over 4 years of experience in Flutter app development. Throughout my career, I' ve honed my skills in using various state management tools like Bloc, Provider, GetX, as well as working extensively with Firebase, in-app purchases, Socket API, REST APIS, and GraphQL. I prioritize writing clean, maintainable code and ensuring a strong architecture, using approaches like MVP and MVVM based on project requirements. My focus is on creating efficient , high-quality mobile applications that solve real problems using the best available packages and programming techniques. Thank you!

INDUSTRIES: Communications and Media, Tools

TECHNICAL SKILLS

• Flutter & Dart	4 years
• Dart	4 years
• Payment Gateway	4 years
• IoT	2 years & 5 months
• Figma	2 years

PROJECT DETAILS

• SoccerCafe — April-2023 - September-2023

Project Description: The SoccerCafe app is mainly used by SoccerGame lovers. I had to develop this app further. My work for this app is mainly to change the whole app UI and continue to develop and implement some RapidAPI and HTTP api. This app is very simple, user can post the Image, and videos and also create a poll for any kind of suggestion. Other users can like, and write reviews for the post and also users can give yellow and red cards to the post. Users can see the score of current and past matches, and also can view the Future match team name. Users can get the push notification for the like, comment, red card, yellow card, add a new post, send request, accept the request and etc. I implement the one signal for push notification. This app contains GET, PUSH, MULTIPART API and RAPID API.
Responsibilities: Redesigned the entire app interface to enhance user experience and align with modern design trends. Ensured the UI is responsive and intuitive for all device types. Enabled users to post images, videos, and create polls for suggestions. Integrated functionality for users to interact with posts via likes, reviews, yellow cards, and red cards.

• BitScanX - Scan Doc PDF Creator — July-2024 - October-2024

Project Description: BitScanX is a mobile document scanner app designed to simplify document management and organization. The app allows users to scan documents, create PDFS, and compress images, making it an essential tool for individuals and professionals.
Responsibilities: Designing and developing the app's features and user interface. Ensuring the app's stability, security, and performance. Testing and debugging the app to resolve issues. Implementing updates and new features based on user feedback. Managing the app's visibility and marketing on the Google Play Store. Providing customer support and addressing User concerns.
Technologies: Flutter, Dart, Firebase
Industry: Tools

EMPLOYMENT HISTORY

• Flutter Developer January-2023 - November-2024

Description: Lead Developer for Crypto Wallet App Collaborated with cross-functional teams to ensure the app met all project requirements and deadlines. Provided technical guidance and mentorship to the team to ensure efficient project execution.

EDUCATION

• Bachelors degree in Bachelor Of Computer Applications from Veer Narmad South Gujarat University 2017 - 2019

LANGUAGES

• English - advanced
