With 5+ years of experience, I'm a skilled web and mobile app developer known for my creative problem-solving and analytical abilities.Throughout my career, I have demonstrated a keen ability to adapt to evolving technologies and deliver high-quality software products that exceed client expectations.

INDUSTRIES: Education, Social Media

TECHNICAL SKILLS

• Android	4 years & 3 months
• Flutter & Dart	3 years
• React js	2 years
• React Native	2 years
• Ionic	6 months

PROJECT DETAILS

• Online Exams — April-2022 - October-2022

Project Description: I took charge of developing two Flutter projects one for an online exam application and the other for a billing application. In the online exam app, I leveraged Flutter's capabilities to create a responsive and intuitive user interface, integrating features such as exam scheduling. real-time scoring, and performance analysis. Similarly, for the billing application, I utilized Flutter to design a user-friendly interface for managing invoices, tracking payments, and generating reports, providing a streamlined solution for businesses.
Responsibilities: A Flutter app developer's role is to create, maintain, and develop applications for Android and iOS using the Flutter framework and Dart programming language. Their responsibilities include
Technologies: Flutter
Industry: Education

• Social Media Application — October-2022 - March-2023

Project Description: Spearheaded the development of a cutting-edge social media platform. Leveraging Node.js for the backend, React JS for the web frontend, and Flutter for the mobile application, we delivered a cohesive user experience across multiple platforms.
Responsibilities: mobile app developer's role in a project involves designing, building, testing, and developing applications for mobile devices. They work in teams with designers and programmers to create apps that meet users' needs.
Technologies: Node.js, React JS, and Flutter
Industry: Social Media

EMPLOYMENT HISTORY

• Software Developer

Description: Online Banking Platform with React JS: Developed a robust online banking platform utilizing React JS for the frontend. This involved creating intuitive user interfaces for account management, transactions, and security features. Social Media Application with Node.js, React JS, and Flutter: Spearheaded the development of a cutting-edge social media platform. Leveraging Node.js for the backend, React JS for the web frontend, and Flutter for the mobile application, we delivered a cohesive user experience across multiple platforms. Community Application Next.js Project: Contributed to a Next.js project, harnessing its capabilities for server-side rendering and building powerful web applications. This project exemplified my expertise in leveraging Next.js to deliver high-performance and SEO-friendly web applications.

• Mobile App Developer April-2022 - October-2022

R K Infotech

Description: Online Exam Application in Android: I led the development of an Android app focused on online exams. This involved extensive use of API calls to fetch exam questions and answers dynamically, along with robust database management to store user data securely. Additionally, I utilise various Android libraries to enhance features and user experience, ensuring seamless navigation and interaction within the app. Flutter Projects for Online Exams and Billing Applications: I took charge of developing two Flutter projects—one for an online exam application and the other for a billing application. In the online exam app, I leveraged Flutter's capabilities to create a responsive and intuitive user interface, integrating features such as exam scheduling, real-time scoring, and performance analysis. Similarly, for the billing application, I utilized Flutter to design a user-friendly interface for managing invoices, tracking payments, and generating reports, providing a streamlined solution for businesses.

• Software Developer January-2020 - April-2022

Elluminati Inc.

Description: After Android training program, I worked on food delivery application, learning key concepts like API integration and database management. Transitioning to Flutter, I recreated the app with enhanced features such as real-time updates using Firebase and seamless navigation with Google Maps integration.

EDUCATION

• Bachelors degree in Computer Engineering from GTU 2016 - 2020

LANGUAGES

• English - intermediate
