+91 9820045154 | hr@augmntx.com

Experienced Flutter app developer. Throughout my career, I've honed my skills in using various state management tools like Bloc, Provider, GetX, and MobX, as well as working extensively with Firebase, in-app purchases, Socket API, REST APIs, and GraphQL. I prioritize writing clean, maintainable code and ensuring a strong architecture, using approaches like MVP and MVVM based on project requirements. My focus is on creating efficient, high-quality mobile applications that solve real problems using the best available packages and programming techniques.

INDUSTRIES: IOT Solutions, Art and Design, Transportation, Shipping

TECHNICAL SKILLS

• Flutter & Dart	4 years
• Firebase	4 years
• API Integration	4 years
• Push Notifications	4 years
• Google Map API	3 years & 5 months
• Google Analytics	3 years & 5 months
• Test cases writing	3 years & 6 months

PROJECT DETAILS

• AirHome — March-2021 - September-2022

Project Description: The AirHome app allows users to control and monitor smart home devices. It uses MQTT for real-time communication, UDP sockets for fast data transmission, and a local database for offline functionality. The app provides seamless control over devices even in areas with poor connectivity.
Responsibilities: Implemented smart home control features, allowing users to manage their home environments efficiently. Developed and maintained the AirHome app, focusing on enhancing its functionality and overall user experience. Deployed features for smart home control, allowing users to efficiently
Technologies: Flutter/Dart
Industry: IOT Solutions

• Lux-ECards — July-2022 - October-2024

Project Description: Lux-ECards app is Ultimate invitation card maker app for Indian users - perfect for all your special occasions! Our easy-to-use app allows you to create stunning and personalized invitations for weddings, obituaries, baby showers, house warmings, engagements, business openings, and more. With a wide range of templates and customization options, you can design unique and eye-catching invitation cards that perfectly match the tone and theme of your event. Add your own text, photos, and colors to create something truly special.
Responsibilities: Developed the app's full functionality, including designing the user interface, implementing core features, and integrating backend services. Ensured smooth performance, seamless user experience, and efficient handling of data storage and retrieval. Oversaw the complete development process, from initial concept to final deployment on the Google Play Store.
Technologies: Flutter/Dart
Industry: Art and Design

• Parsel

Project Description: Parselexchange is a mobile app that offers real-time shipment tracking and comprehensive order management solutions. It enhances the e-commerce experience with advanced tracking features, a user-friendly interface, and seamless integration with various carriers. The app ensures efficient order handling and provides detailed tracking information to improve customer satisfaction. Ideal for businesses seeking to streamline their logistics and improve transparency.

Responsibilities: Improved customer satisfaction and usability. Developed and maintained the ParselExchange mobile app, focusing on real-time shipment tracking and comprehensive order management solutions. Collaborated with cross-functional teams to ensure the app met all project requirements and deadlines.

Technologies: Flutter/Dart

Industry: Shipping

EMPLOYMENT HISTORY

• Flutter Developer

Description: Develop and maintain cross-platform mobile apps using Flutter/Dart. Implement responsive UI/UX designs and ensure smooth navigation. Integrate RESTful APIs and manage app state efficiently (GetX, Provider, Bloc). Write and maintain unit, widget tests for code quality. Collaborate with designers, backend developers, and QA teams. Optimize app performance, memory usage, and responsiveness. Use Git for version control. Debug, fix bugs, and ensure compatibility with platform updates.

• Flutter Developer October-2022 - May-2023

Adrixus Tech Studio

Description: Developed and maintained the Toksi: Tokenized Taxi app, focusing on enhancing its functionality and user experience. Implemented features for tokenized payments, allowing users to pay for rides securely and efficiently.

• Flutter Developer January-2021 - September-2022

Encodework Solution

Description: Implemented smart home control features, allowing users to manage their home environments efficiently. Developed and maintained the AirHome app, focusing on enhancing its functionality and overall user experience. Deployed features for smart home control, allowing users to efficiently manage their home environments.

EDUCATION

• Bachelors degree in Bachelor of Computer applications from Veer Narmad South Gujarat University 2018 - 2021

LANGUAGES

• English - advanced
