+91 9820045154 | hr@augmntx.com

An experienced Flutter developer with over four years of expertise in designing, developing, and deploying high-quality mobile applications. Skilled in state management using Bloc, Provider, Riverpod, and GetX, with a strong foundation in building scalable solutions. Adept at integrating RESTful APIs using http and dio, implementing responsive designs with screenutil, and ensuring multilingual support through easy_localization. With a background in native Android development and a hands-on approach to debugging, testing, and deploying apps on both Google Play Store and Apple App Store, I am committed to creating user-centric, efficient, and innovative digital solutions.

INDUSTRIES: Dating, Hospitality

TECHNICAL SKILLS

• Git	6 years
• Flutter & Dart	5 years
• RESTful API	5 years
• Firebase	3 years
• Android	1 years

PROJECT DETAILS

• QaboolHai — January-2022 - December-2024

Project Description: A cutting-edge matchmaking platform designed to revolutionize the process of finding life partners within the Muslim community. This innovative app blends traditional values with modern technology to provide a seamless and culturally sensitive matchmaking experience. QaboolHai offers a user-friendly interface, robust privacy and security measures, and a global reach, enabling individuals to connect across regions while maintaining respect for Islamic principles. By addressing the challenges of conventional matchmaking methods, QaboolHai stands out as a platform that empowers users to find meaningful connections in a secure, efficient, and values-driven environment.

Responsibilities: Played a key role in developing QaboolHai, a matchmaking platform, using Flutter for a seamless cross-platform experience and Bloc for efficient state management. Wrote automated tests to ensure app reliability and maintainability. Deployed the app on both Google Play Store and Apple App Store, ensuring optimal performance and user engagement post-launch.

• Pearl Continental Hotels August-2022 - December-2024

Project Description: Developed the Pearl-Continental Hotels App, a comprehensive mobile solution for seamless hotel bookings, dining reservations, event planning, and loyalty program management across Pakistan's premier hotel chain. Utilized Flutter for cross-platform development, implemented Firebase push notifications, and implemented a user-centric design to enhance customer experience. Successfully deployed the app on the Google Play Store and Apple App Store, ensuring robust functionality and optimal performance.

Responsibilities: Debugged and resolved critical bugs to ensure a smooth user experience. Implemented modern, responsive designs to enhance UI/UX. Integrated RESTful APIs for seamless communication between the app and backend services. Deployed the application to both Google Play Store and Apple App Store, ensuring optimal performance and accessibility for users.
