PROJECT DETAILS

• E-Commerce Website — February-2023 - October-2023

Project Description: A platform facilitating online shopping with features such as product categories, shopping carts, and secure payments.

Responsibilities: Tested shopping cart, wishlist, and checkout functionalities for error-free transactions. Conducted cross-browser and cross-device testing to ensure compatibility. Validated payment gateway integration and transaction security. Automated regression testing for new feature releases. Performed API testing for order processing and inventory management. Documented test scenarios and defects, ensuring timely resolution. Participated in UAT to align platform features with user expectations.

Technologies: Manual Testing, Selenium, MySQL, Postman, JMeter.

Industry: Ecommerce

• Guru99 — November-2023 - January-2025

Project Description: An online platform offering tutorials and resources for IT training. Features include course management, quizzes, and user engagement tracking.

Responsibilities: Designed and executed comprehensive test cases for e-learning modules and quizzes. Conducted performance testing to ensure system scalability during high user traffic. Validated API integrations for course management and progress tracking. Collaborated with developers to resolve critical issues and enhance platform stability. Automated test scenarios for repetitive workflows using Selenium. Ensured data accuracy and compliance with user privacy standards. Documented test results and provided actionable insights to stakeholders.

Technologies: Manual Testing, Selenium, MySQL, ETL tools

Industry: Education

• Multiple Shopify Websites August-2022 - January-2023

Project Description: A series of Shopify-based e-commerce sites catering to diverse industries with custom themes and plugins.

Responsibilities: Validated custom themes and plugins for functionality and responsiveness. Performed API testing for third-party plugin integrations. Conducted usability testing to enhance customer experience. Collaborated with development teams to resolve identified issues. Automated test cases for frequent workflows using Selenium. Ensured SEO optimization and page load performance. Monitored site stability post-deployment.

Technologies: Shopify

Industry: Ecommerce
