A results-driven QA Automation Engineer with 4+ years of experience in automating UI and API testing. Skilled in Selenium (Java), Cucumber BDD, and RestAssured, with expertise in building scalable automation frameworks. Adept at integrating test automation into CI/CD pipelines using Jenkins and ensuring high-quality software through efficient testing strategies. Experienced in working with Agile teams and enhancing automation frameworks for improved test coverage and efficiency.

**INDUSTRIES:** Banking and Finance, Social Media

## TECHNICAL SKILLS

| | |
|---|---|
| • QATesting | 4 years & 1 months |
| • RestAssured | 4 years & 1 months |
| • Cucumber B | 4 years & 1 months |
| • Postman | 4 years & 1 months |
| • Selenium | 4 years & 1 months |
| • Automation Testing | 4 years & 1 months |
| • Storybook | 1 years & 1 months |
| • Cyprus | 1 years |
| • Playwright | 1 years & 1 months |
| • Browserstack | 6 months |

## PROJECT DETAILS

• Digital Transactions Platform August-2021 - March-2024

Project Description: This project facilitates digital transactions by connecting merchants, consumers, banks, and financial institutions. It enables secure payment processing by authorizing, routing, and settling transactions between cardholders and merchants. Payment networks also enforce security protocols, fraud prevention measures, and compliance with financial regulations to ensure smooth and reliable transactions.

Responsibilities: Developed and executed automated test scripts using Selenium WebDriver -Java and JavaScript, Cucumber BDD framework, covering regression, functional, and integration testing for web applications. Collaborated closely with development and QA teams to identify and prioritize test cases for automation, resulting in improved test coverage and reduced regression defects. Implemented automated API testing using tools such as Postman and REST Assured, ensuring comprehensive test coverage for backend services. Integrated automated tests into CI/CD pipelines using Jenkins, enabling continuous testing and deployment of software updates with minimal manual intervention. Performed sanity testing, smoke testing, and performance testing to validate software changes. Participated in daily stand-up meetings, sprint planning, and retrospective meetings as part of the Agile development process. Developed and maintained test automation frameworks to streamline the testing process, ensuring efficient and consistent quality assurance

Technologies: Java, Selenium, JavaScript, Cucumber BDD, Maven, RestAssured, Junit, Rest APIs, Jmeter, Postman, Figma, GIT, Jira, Jenkins

Industry: Banking and Finance

• Social Media Platform Testing

Project Description: This project involves the end-to-end testing of a social media platform that supports both mobile and desktop versions. The goal is to ensure a seamless user experience, functionality, security, and performance across different devices, browsers, and operating systems.
Responsibilities: Developed and maintained automation scripts using Selenium with Java and JavaScript for web application testing. API Automation Testing: Created automated API test scripts using RestAssured to validate API responses and integrations. Framework Enhancement: Contributed to enhancing the existing Cucumber BDD framework by optimizing reusable methods and improving reporting mechanisms. Test Execution & Reporting: Executed automated test cases and analyzed test results using TestNG and Extent Reports for better insights. CI/CD Integration: Integrated automation scripts with Jenkins for continuous testing and deployment. Bug Identification & Reporting: Identified automation defects and reported them using JIRA with detailed logs and screenshots. Collaboration & Code Reviews: Worked closely with developers and manual testers to ensure automation coverage and conducted peer reviews for script improvements. Implemented test automation scripts to execute end-to-end testing, significantly reducing manual testing efforts and improving coverage.
Technologies: Java, Selenium, JavaScritpt, Cucumber BDD, Maven, RestAssured, Junit, Rest APIs, Jmeter, Postman, Figma, GIT, Jira, Jenkins
Industry: Social Media

## EMPLOYMENT HISTORY

• Automation QA Engineer

Description: A visionary, results-driven QA Automation Engineer with 4+ years of experience, specializing in automating UI tests with selenium (java) and API tests using RestAssured. Demonstrated experties in building scalable BDD frameworks with cucumber. Dedicated, adaptable, and detail-oriented, with a strong ability to collaborate with cross-functional teams to deliver high quality software solutions.

## EDUCATION

• Bachelors degree in Bachelor of Computer Applications from NA 2018 - 2021

## LANGUAGES

• English - native
